Agent Framework.

group chat

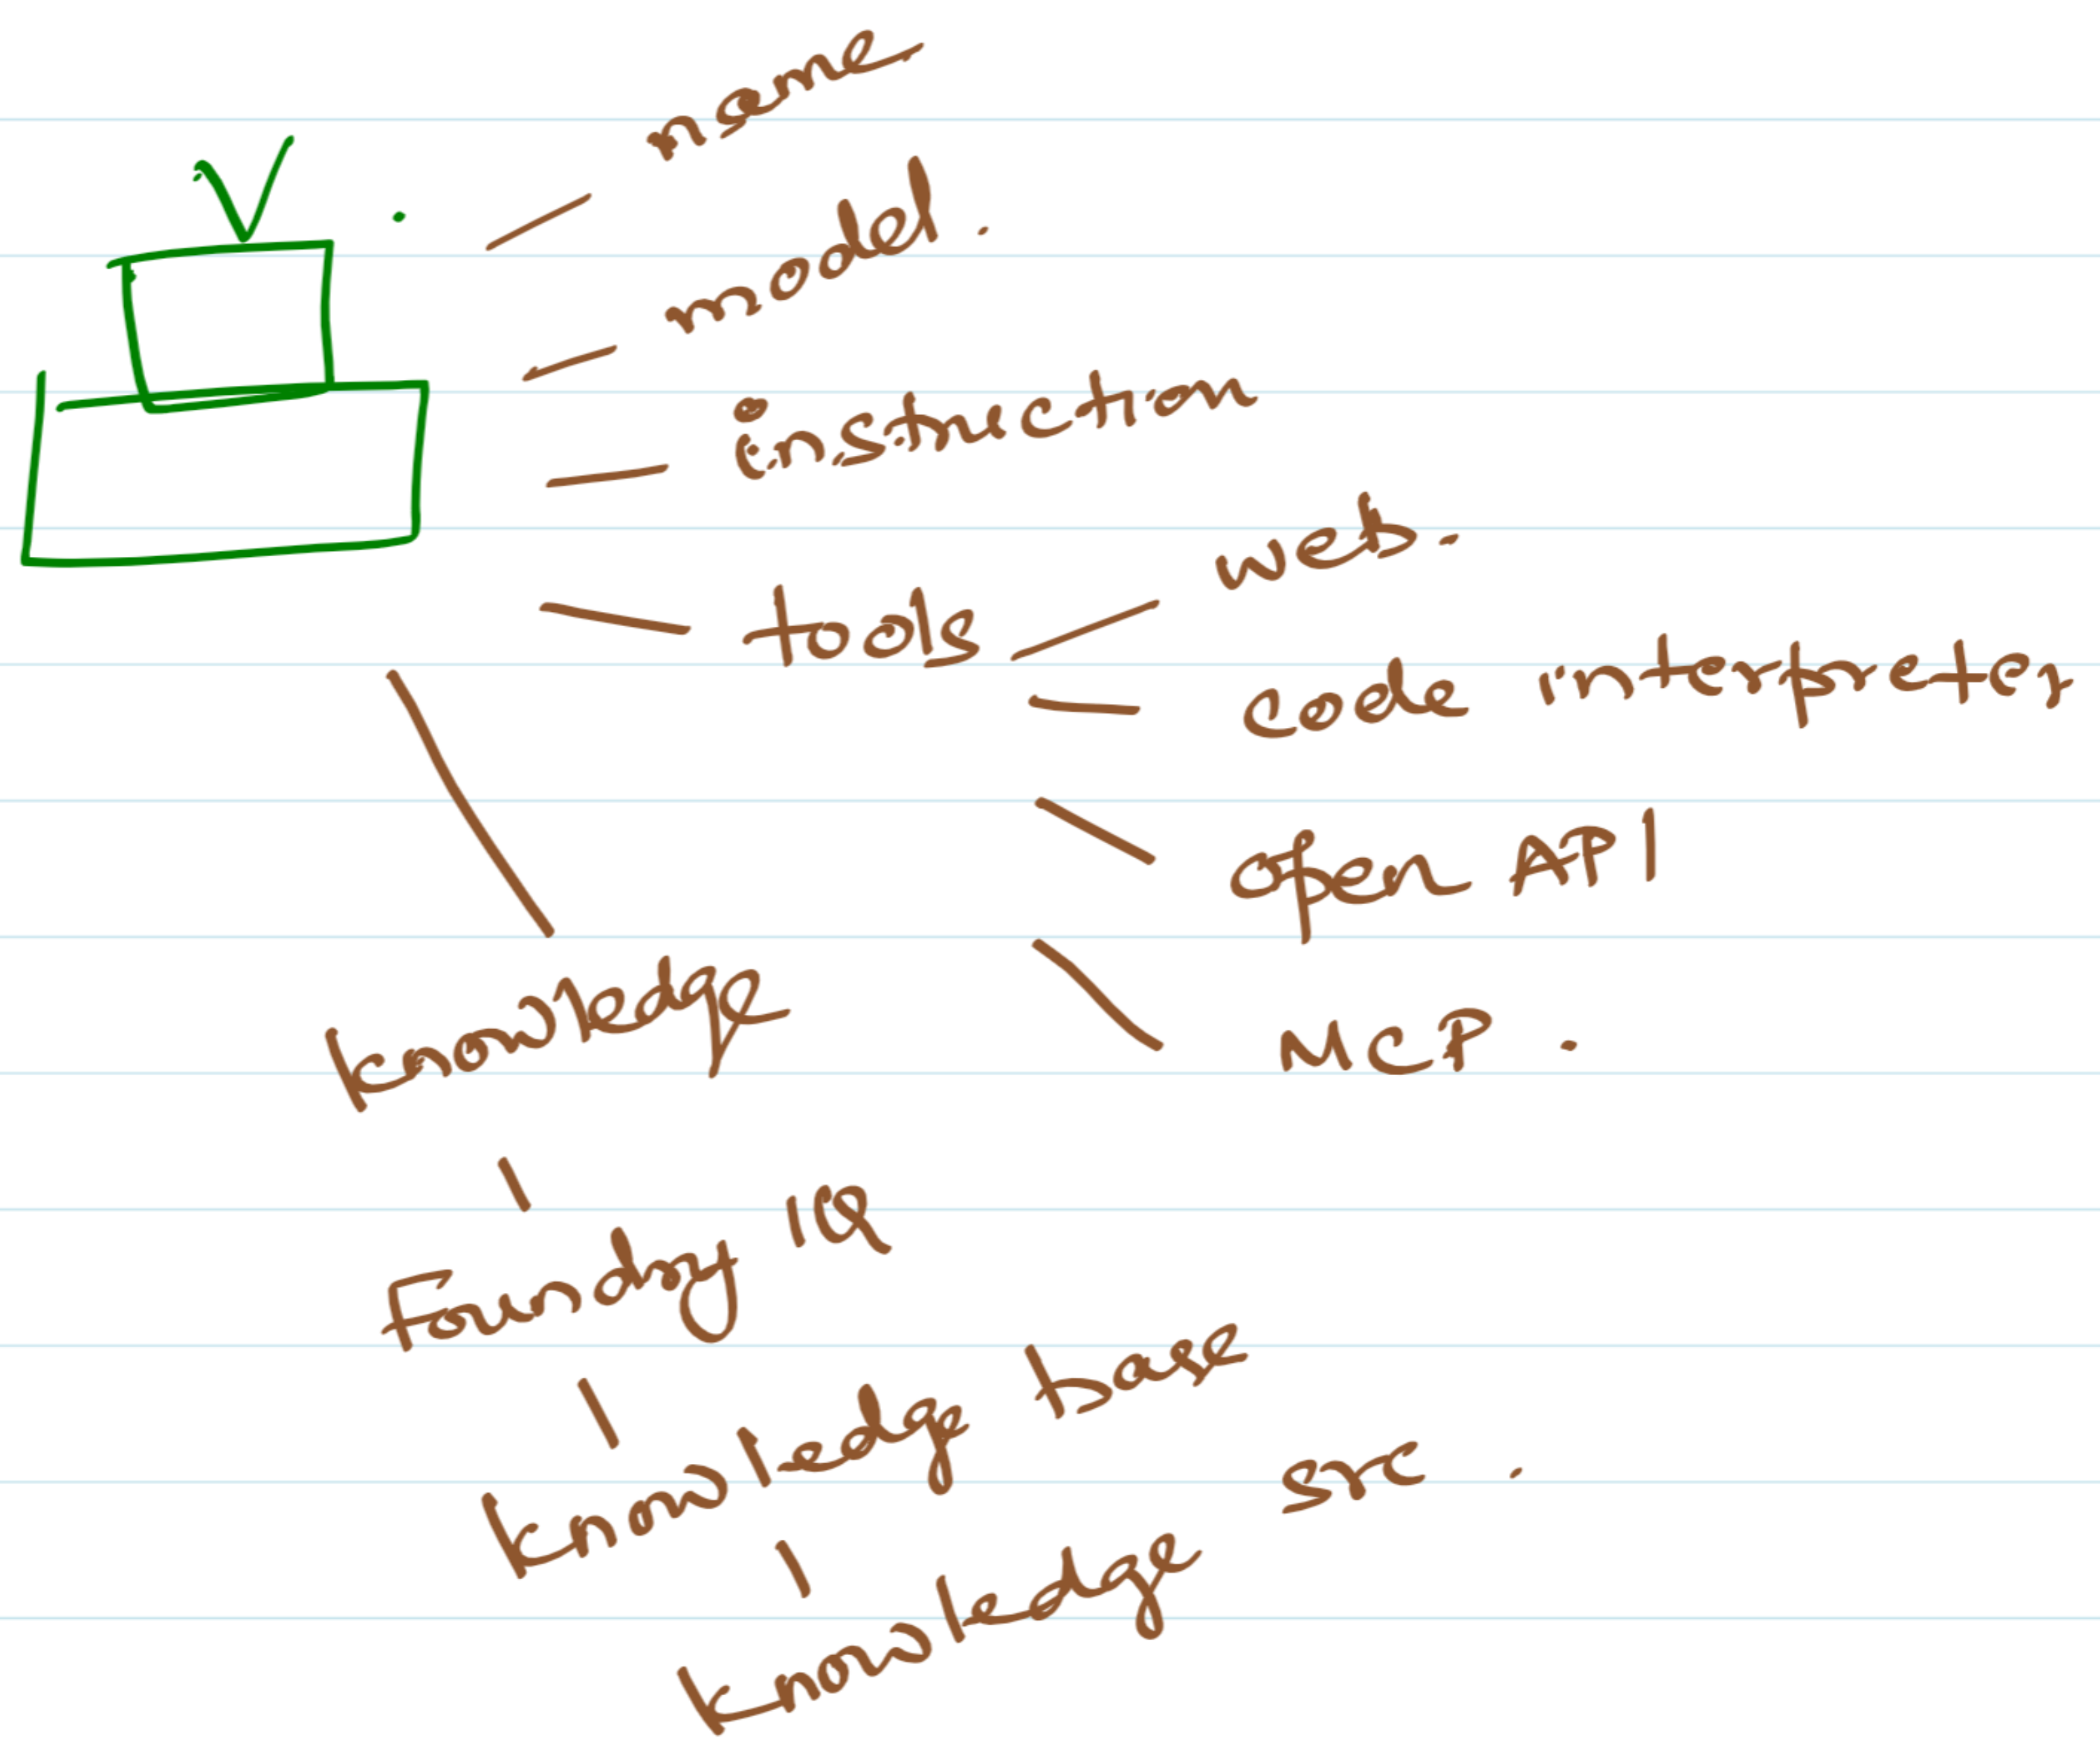

magentic
(autonomous)

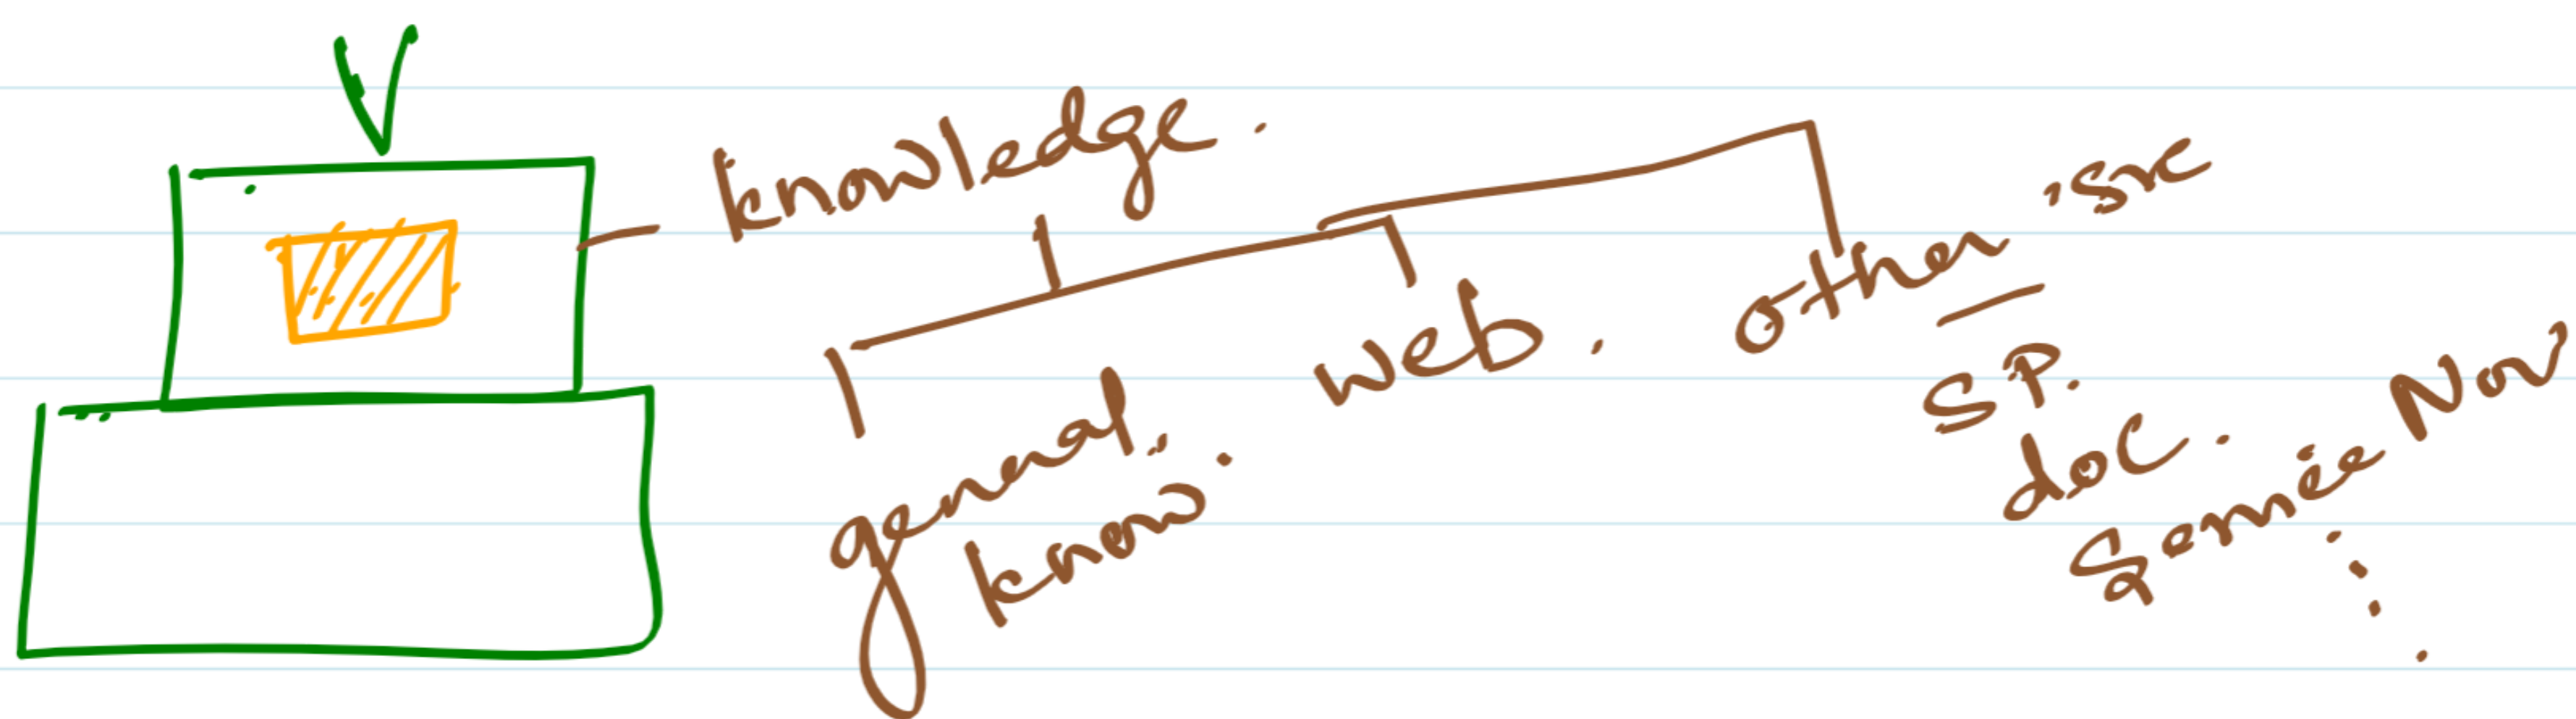

Agent framework.

- multi-agent

Publish → M365 Copilot + Teams. (foundry)
→ web. appln.

Tools

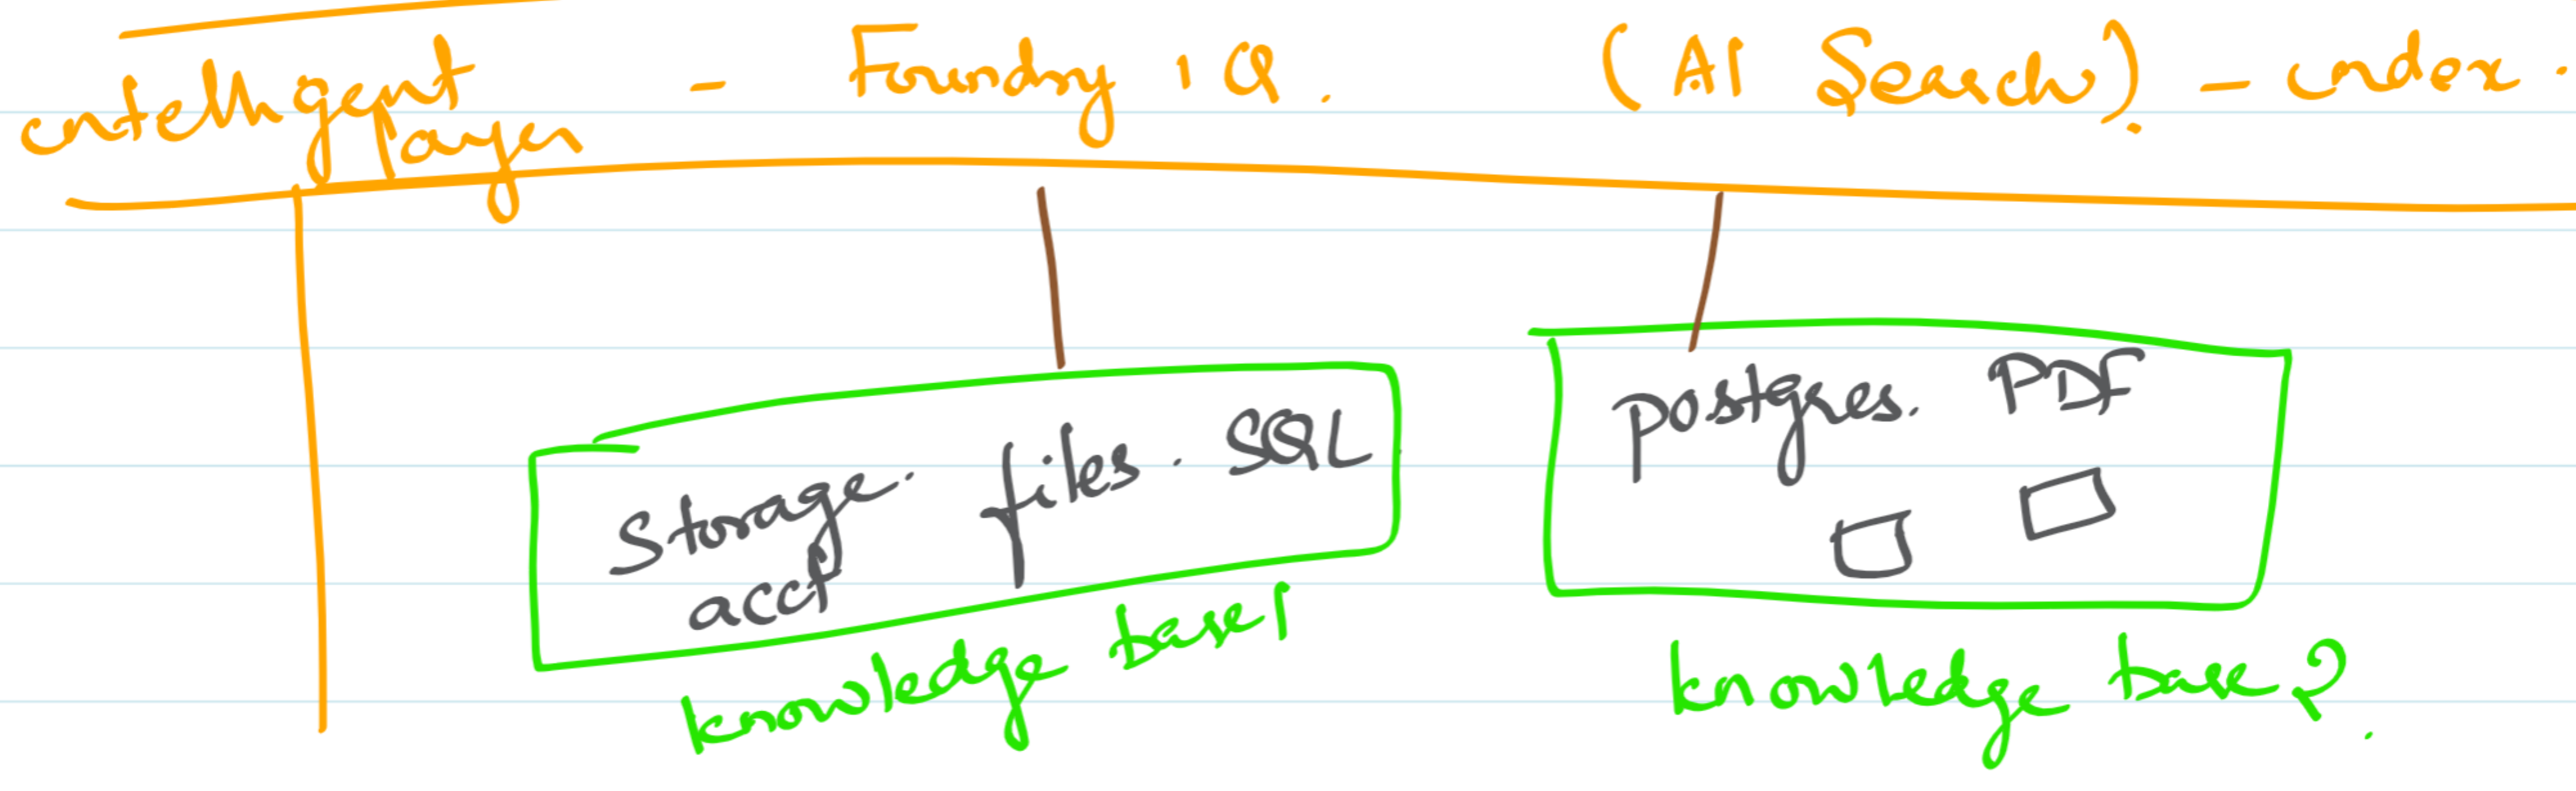

- 1) web. - on.
 - 2) code interpreter.
 - 3) Open API - exy API deployed.
- agent to consume this API.

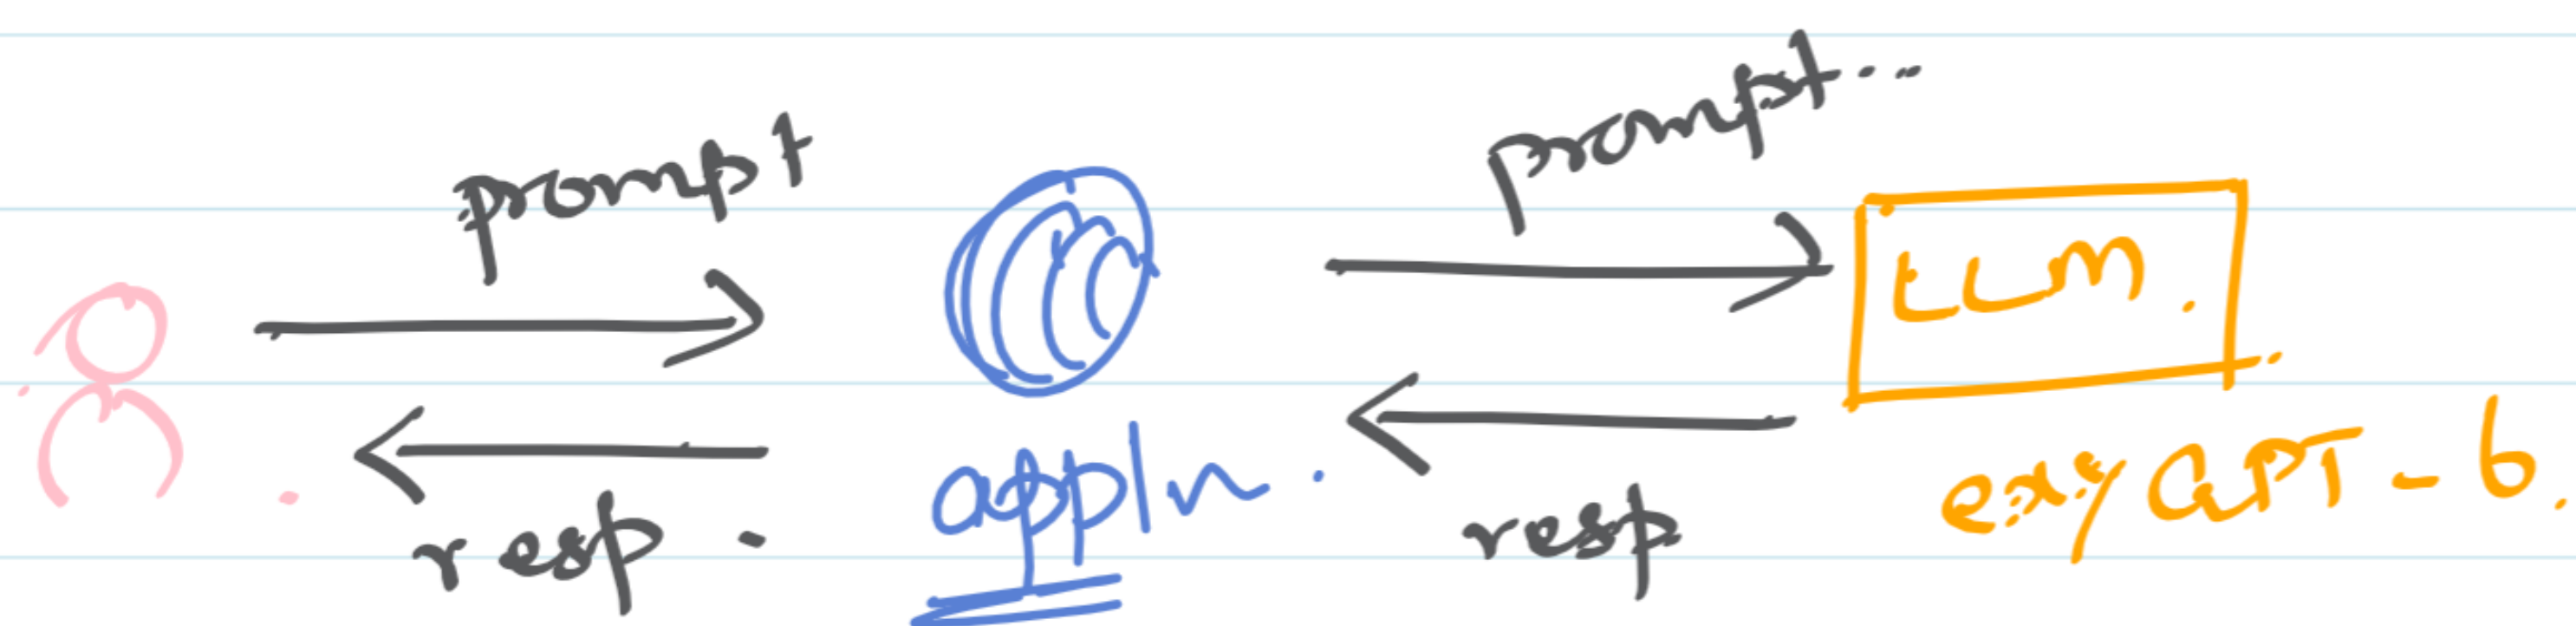

generate OpenAPI schema of the deployed API

upload the schema to agent.

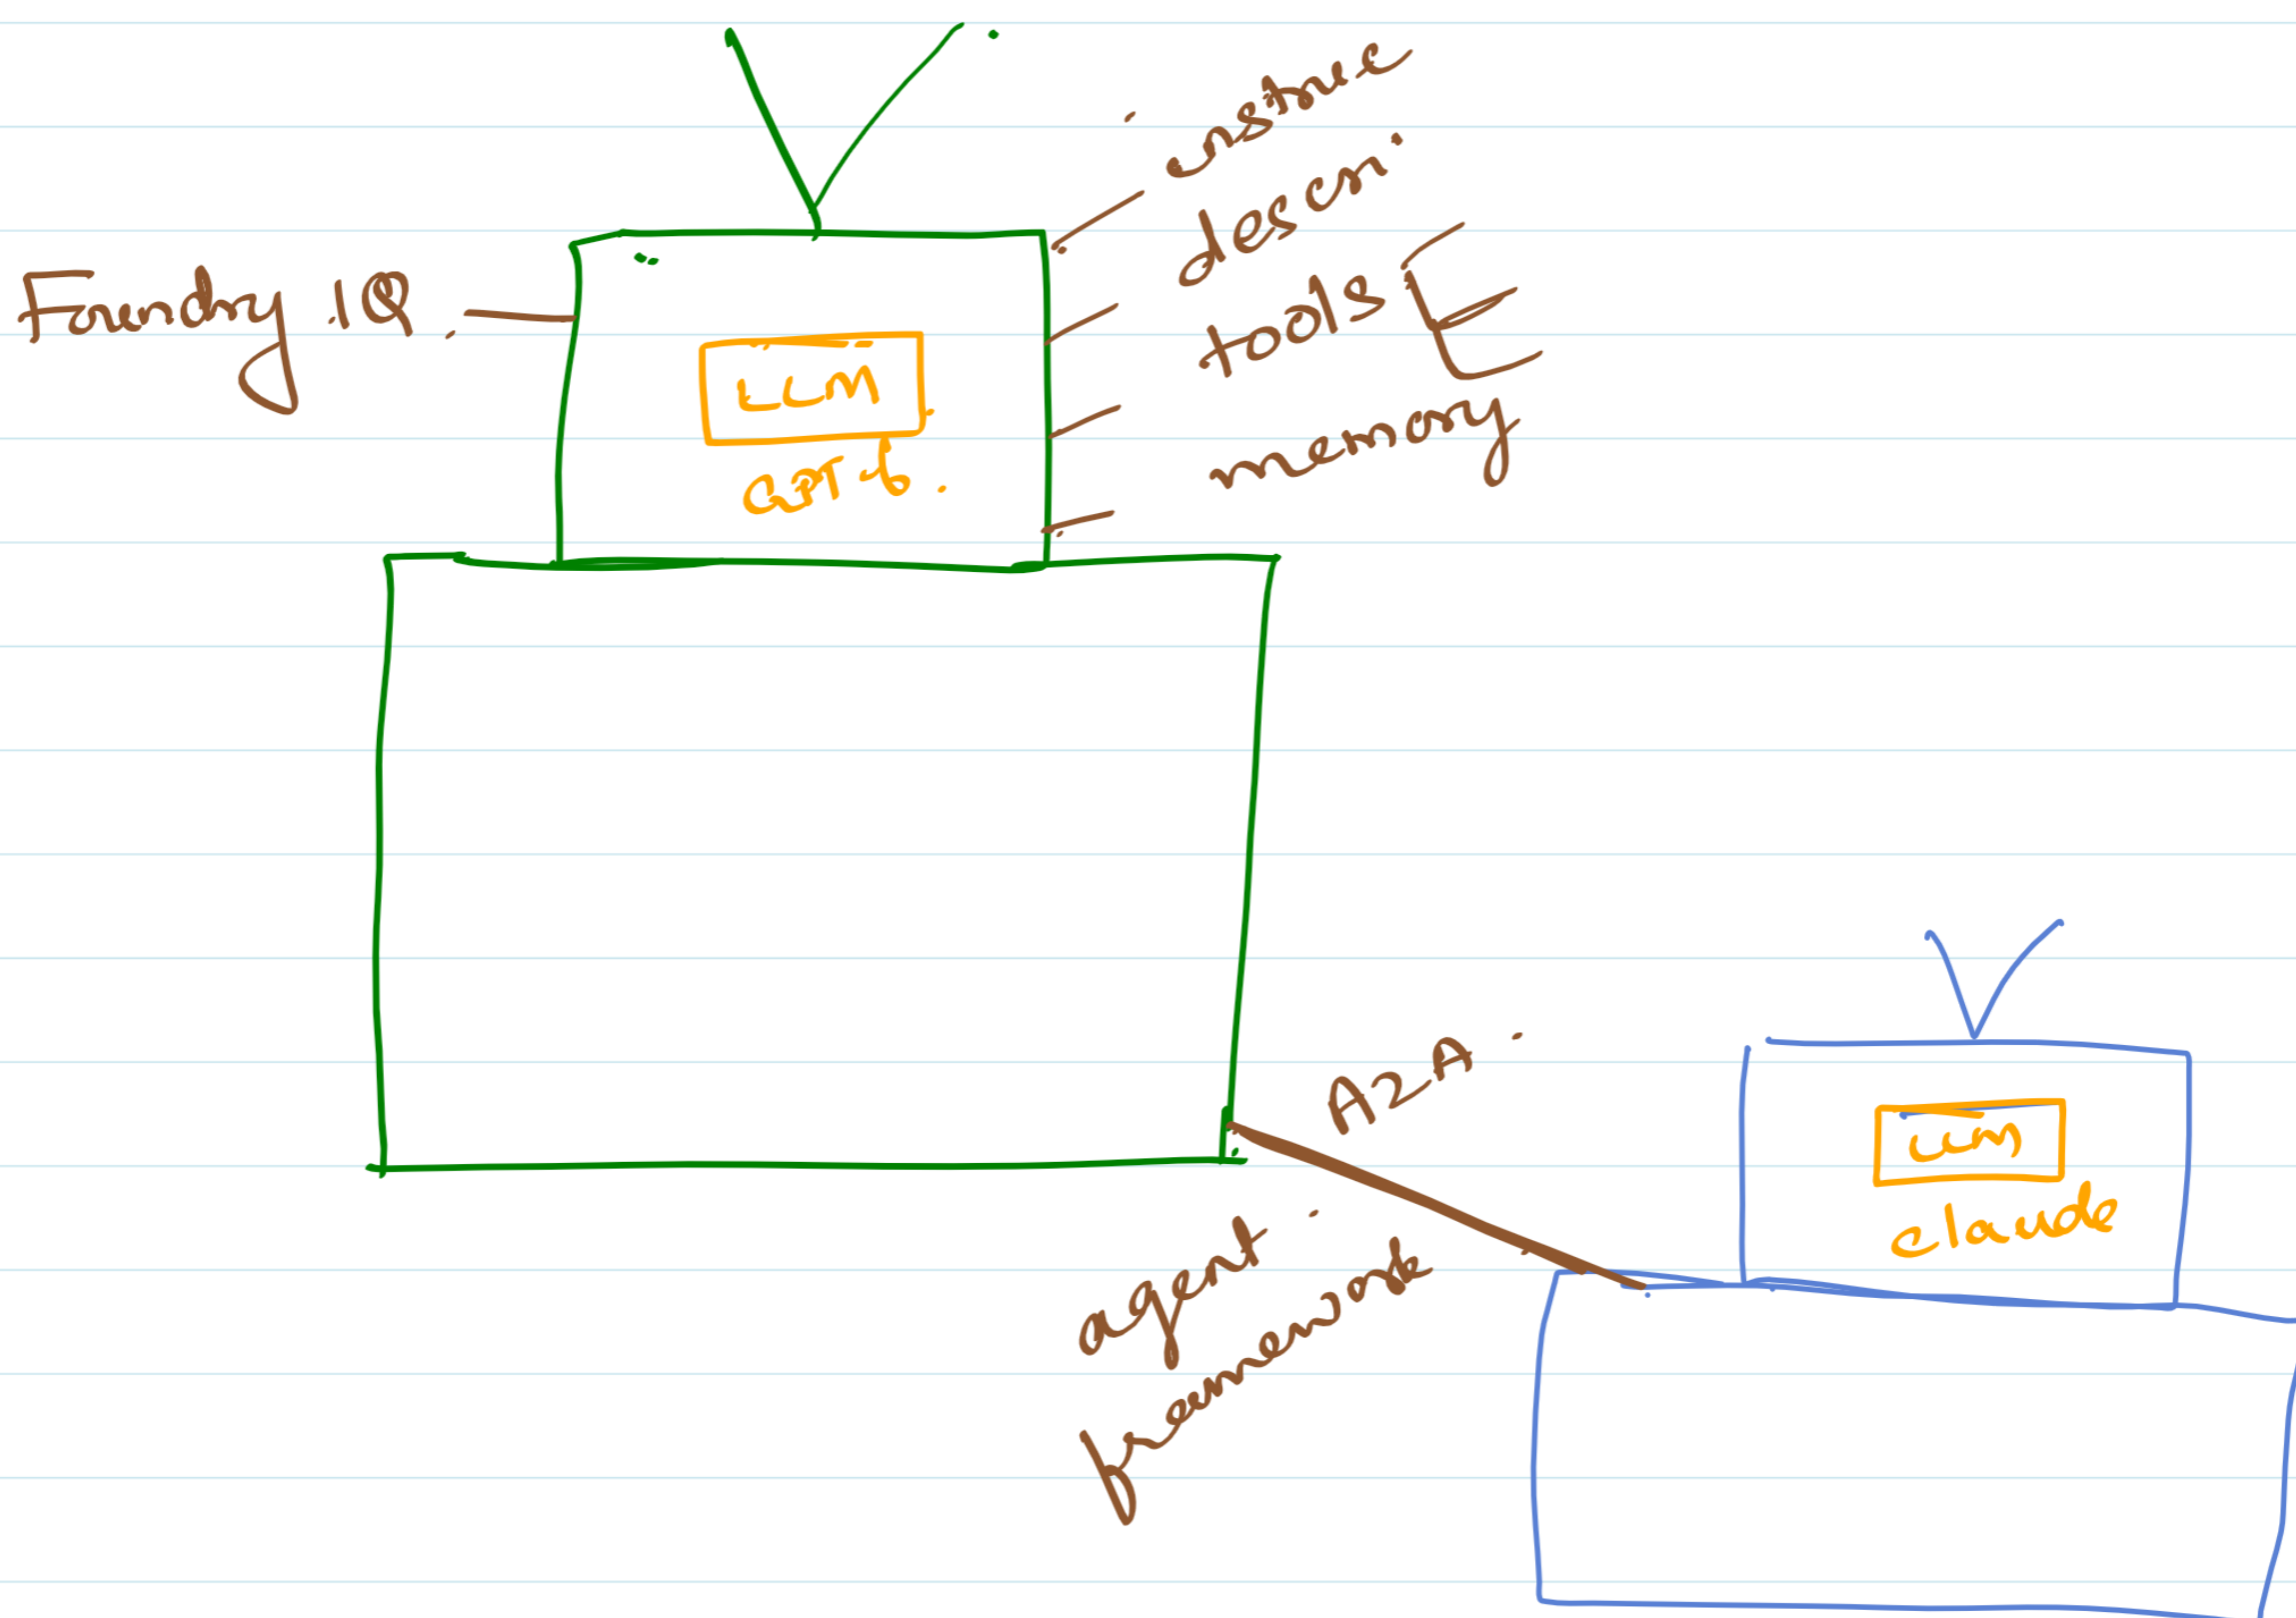

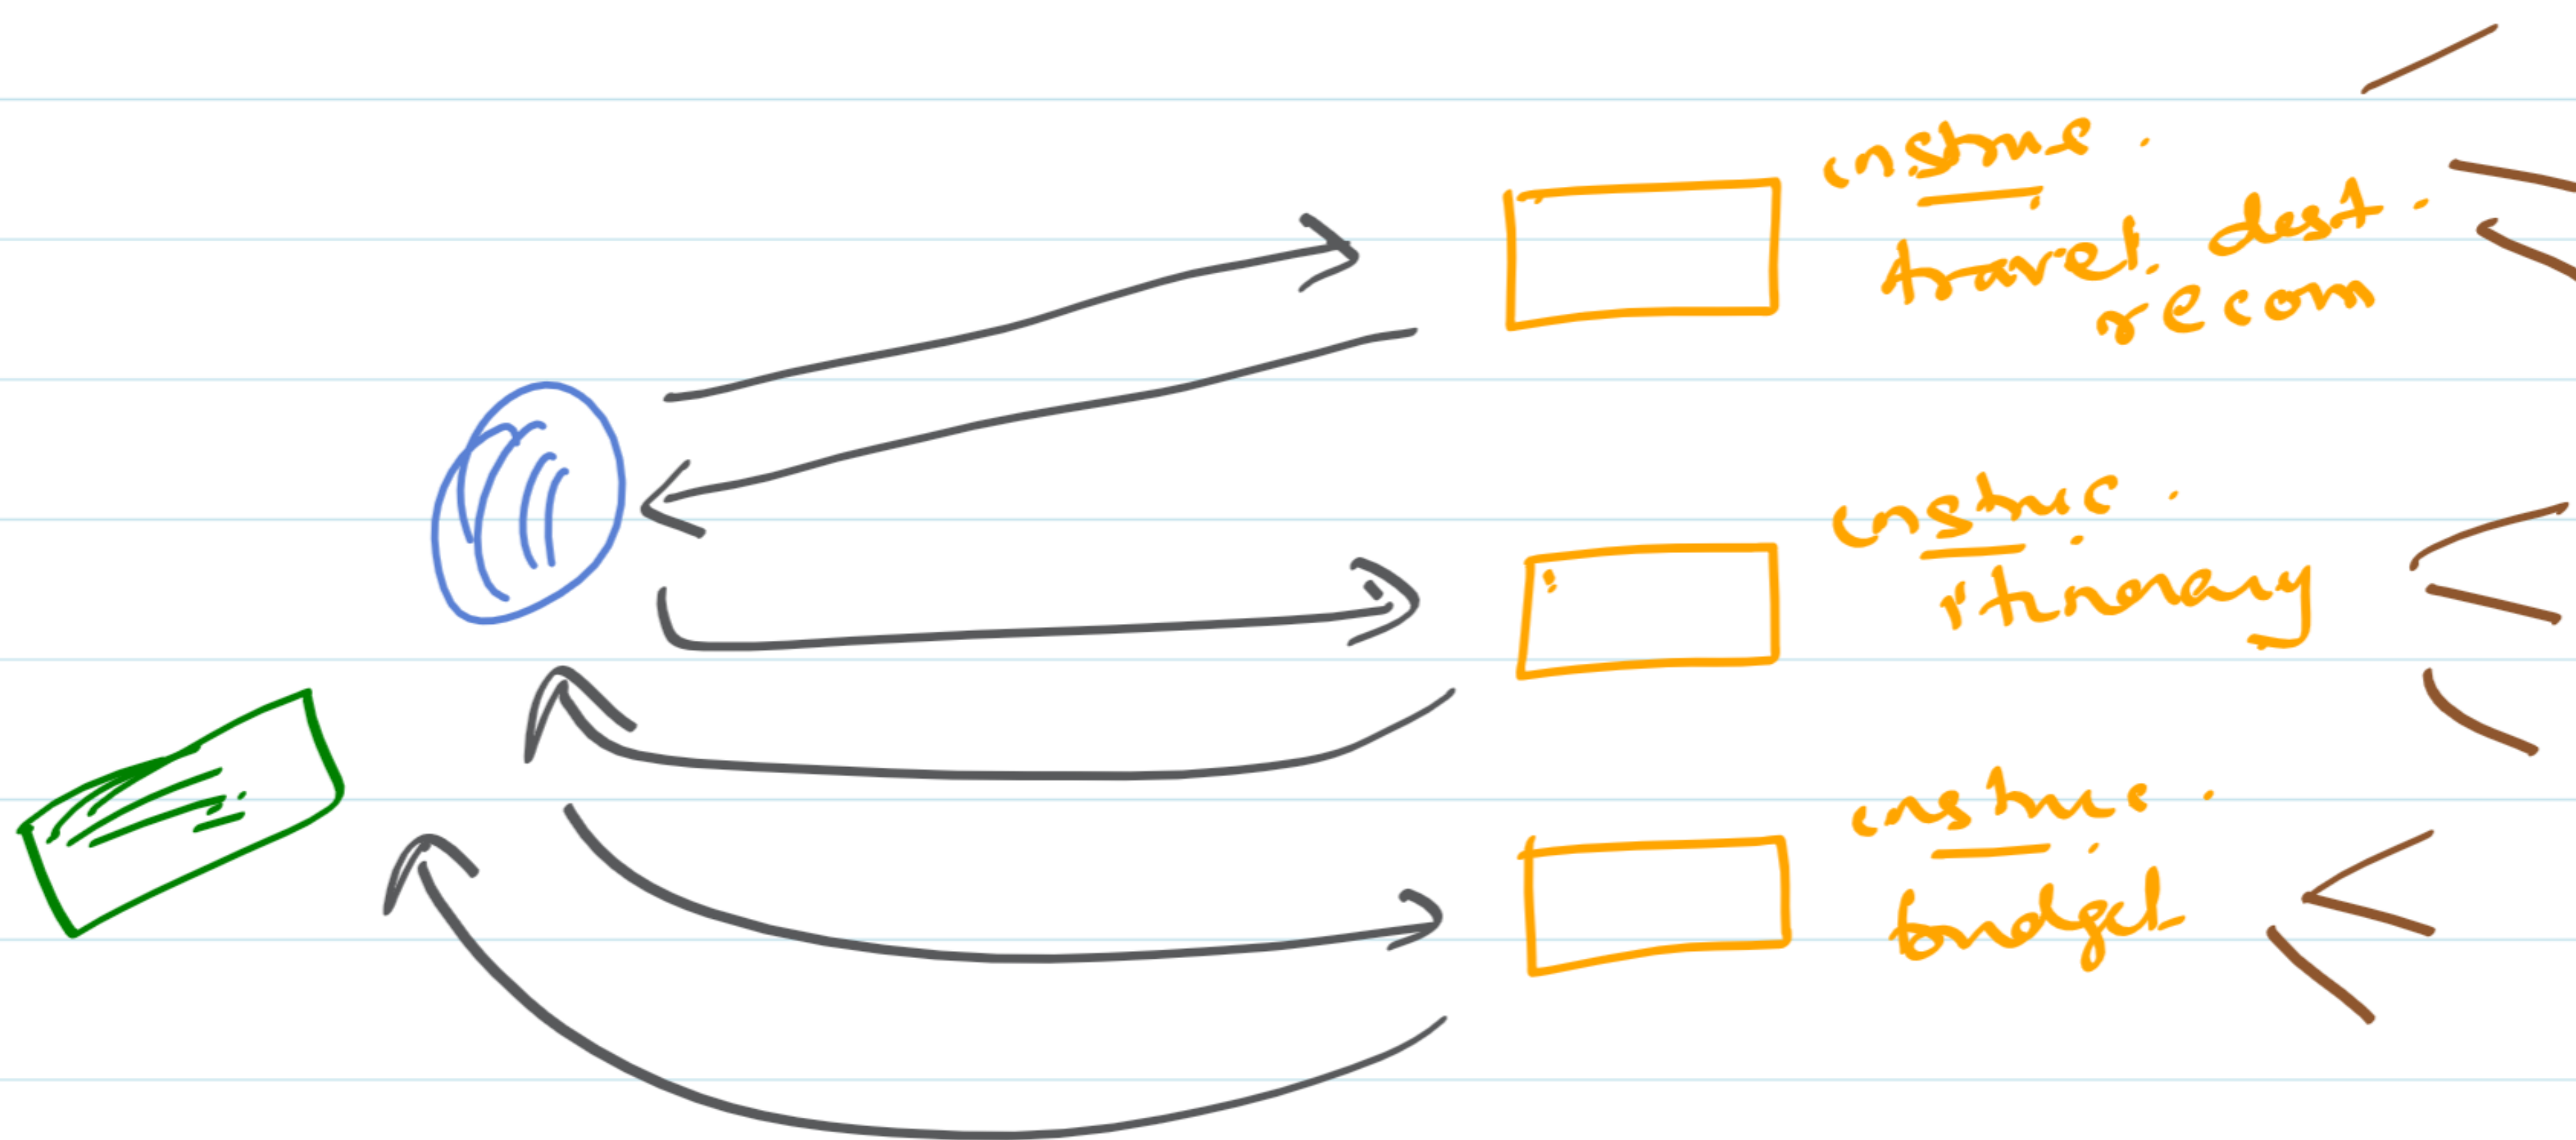

Knowledge

Agentic retrieval

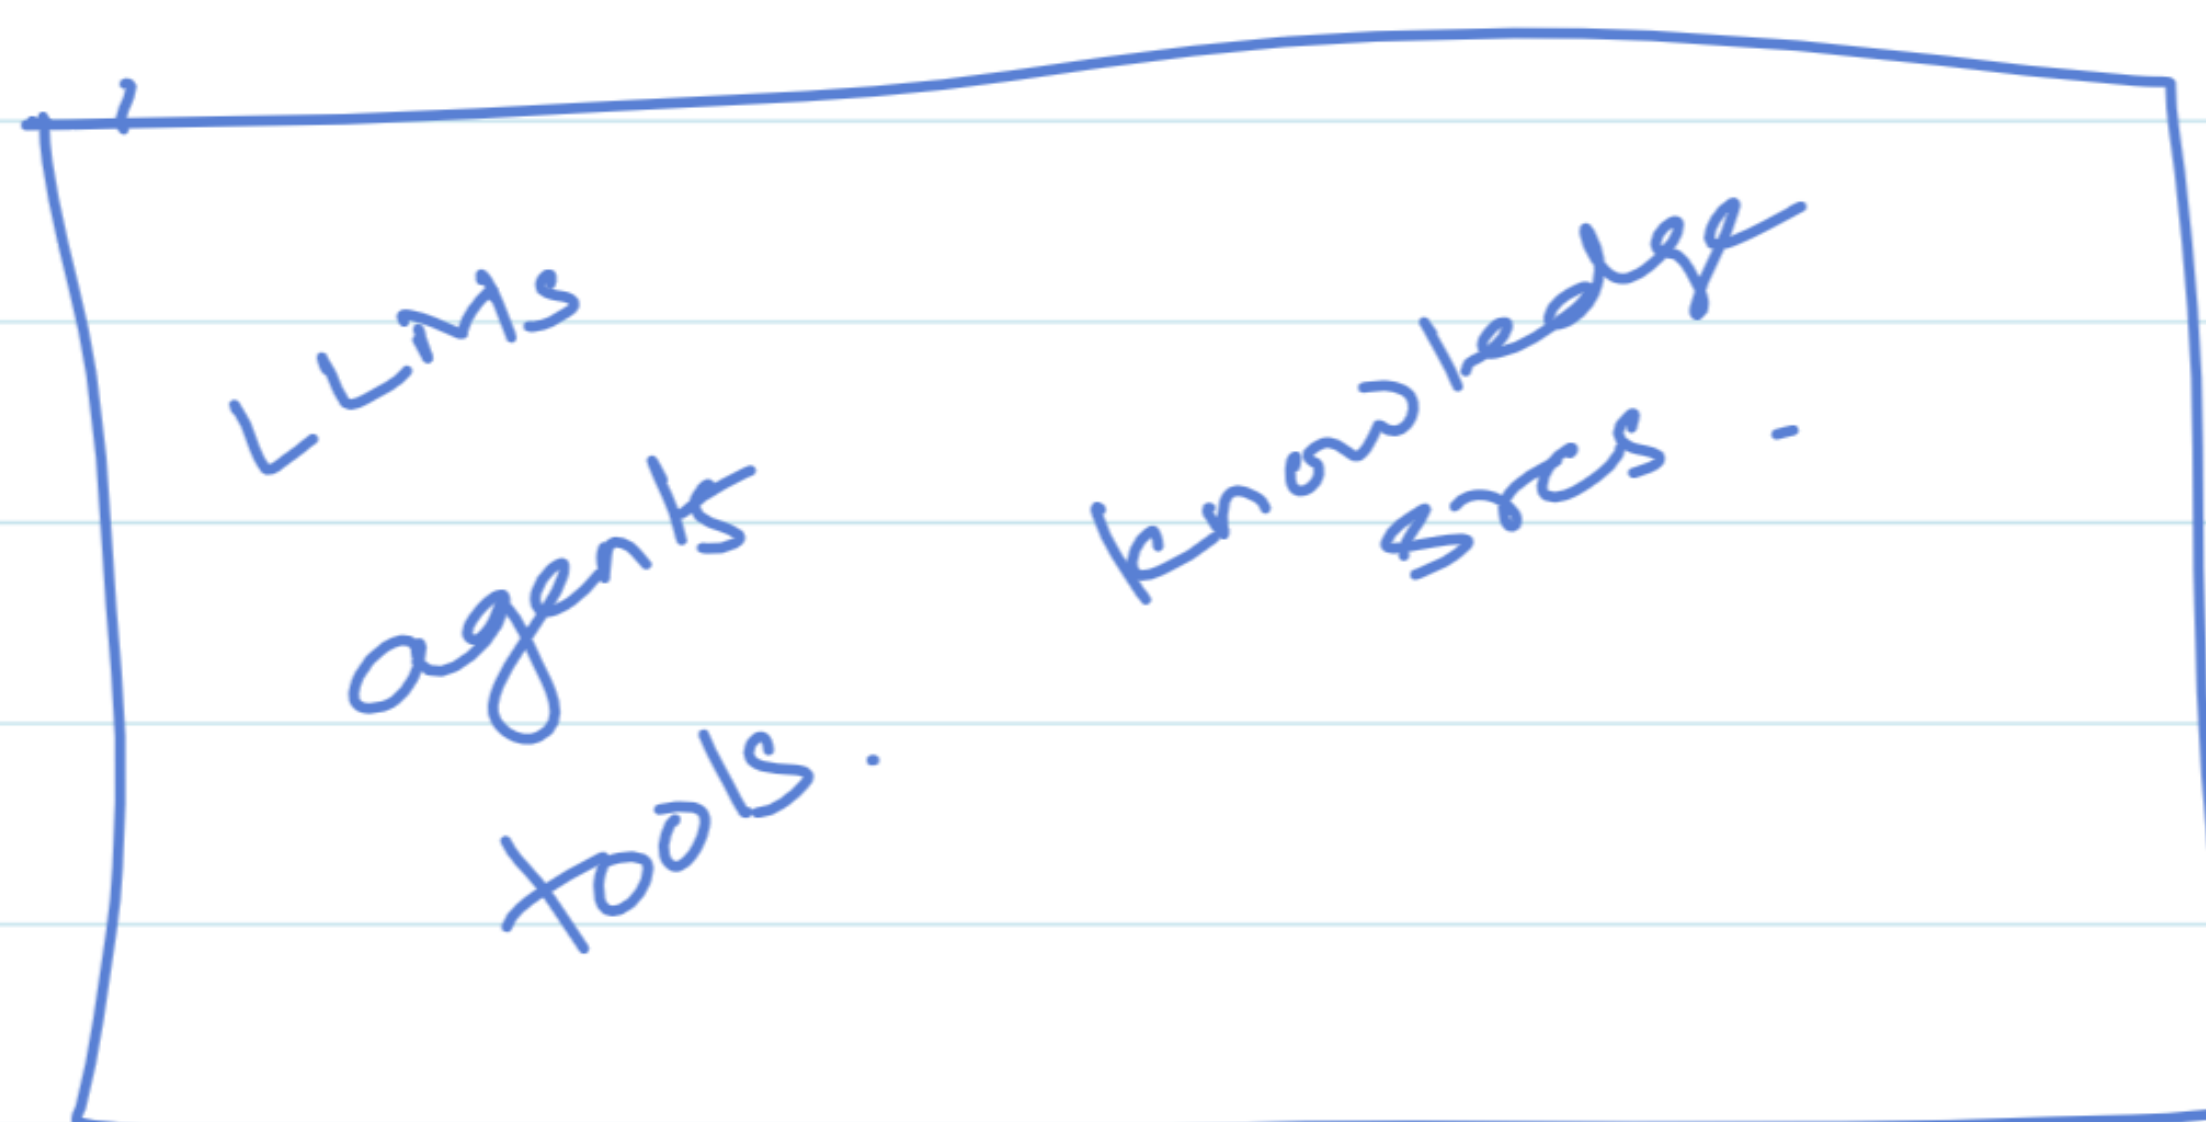

- * implement complex scenarios ✓
- * orchestrate LLM. ✓
- * grounded b/c (at ease)
- * tool calling.

Microsoft Foundry.

- develop.
- deploy.
- collaborate.

Choose. model?

→ Significance

→ text / video / image % input.
text / image : output

→ context. window

→ cut off

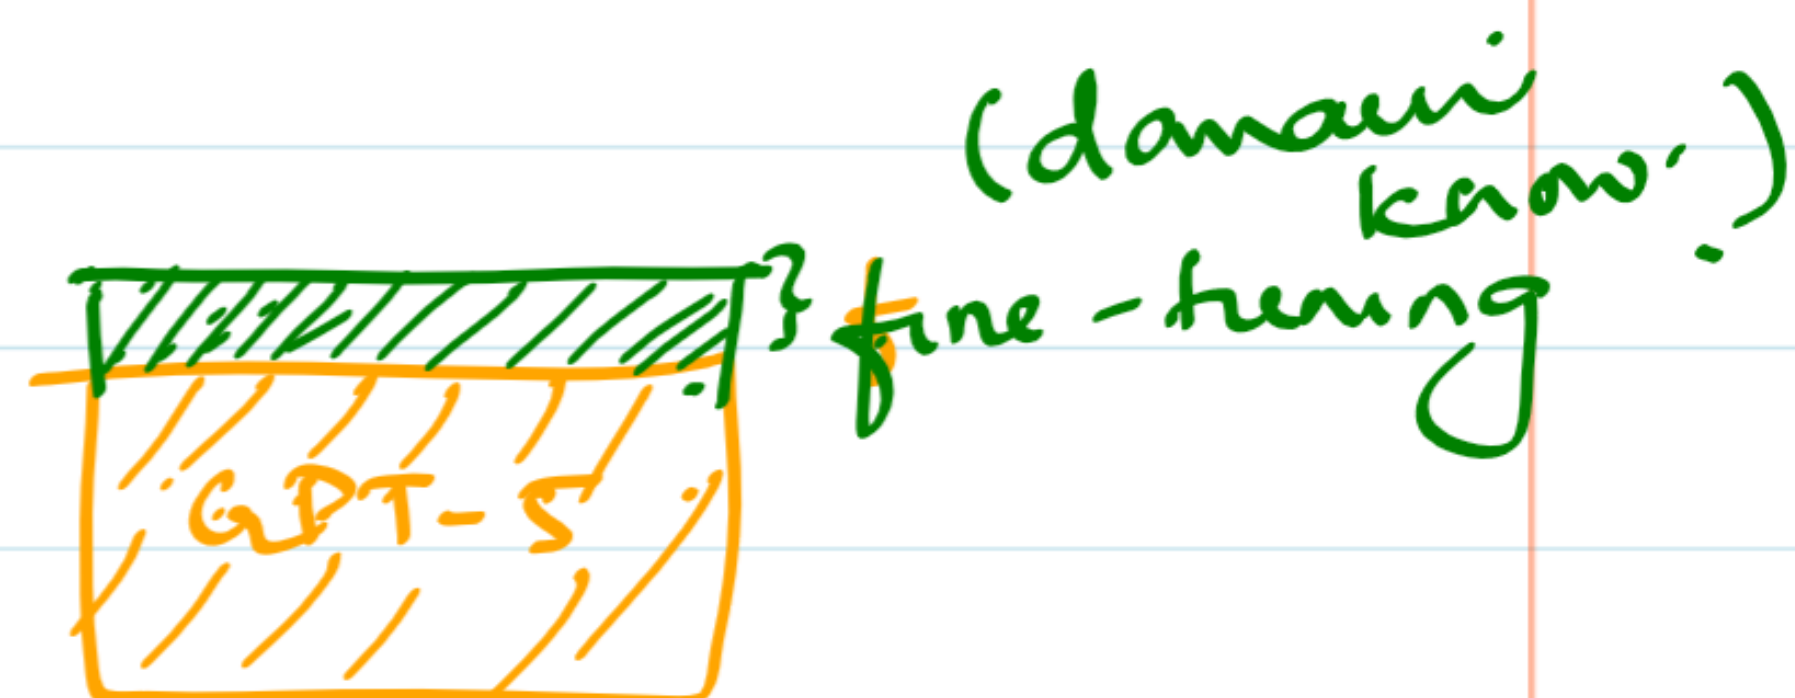

→ cost.

→ region.

→ reasoning.

(-min)

→ fine tuning

Options

Agent · builder · — live M365 Copilot, knowledge only

Copilot Studio — no code, knowledge, actions, tools.

M365 Agent · Toolkit — pro code, knowledge, actions, tools
agent to live inside Teams.

Microsoft Foundry — pro code, know, actions, tools,
choose your own LLM.

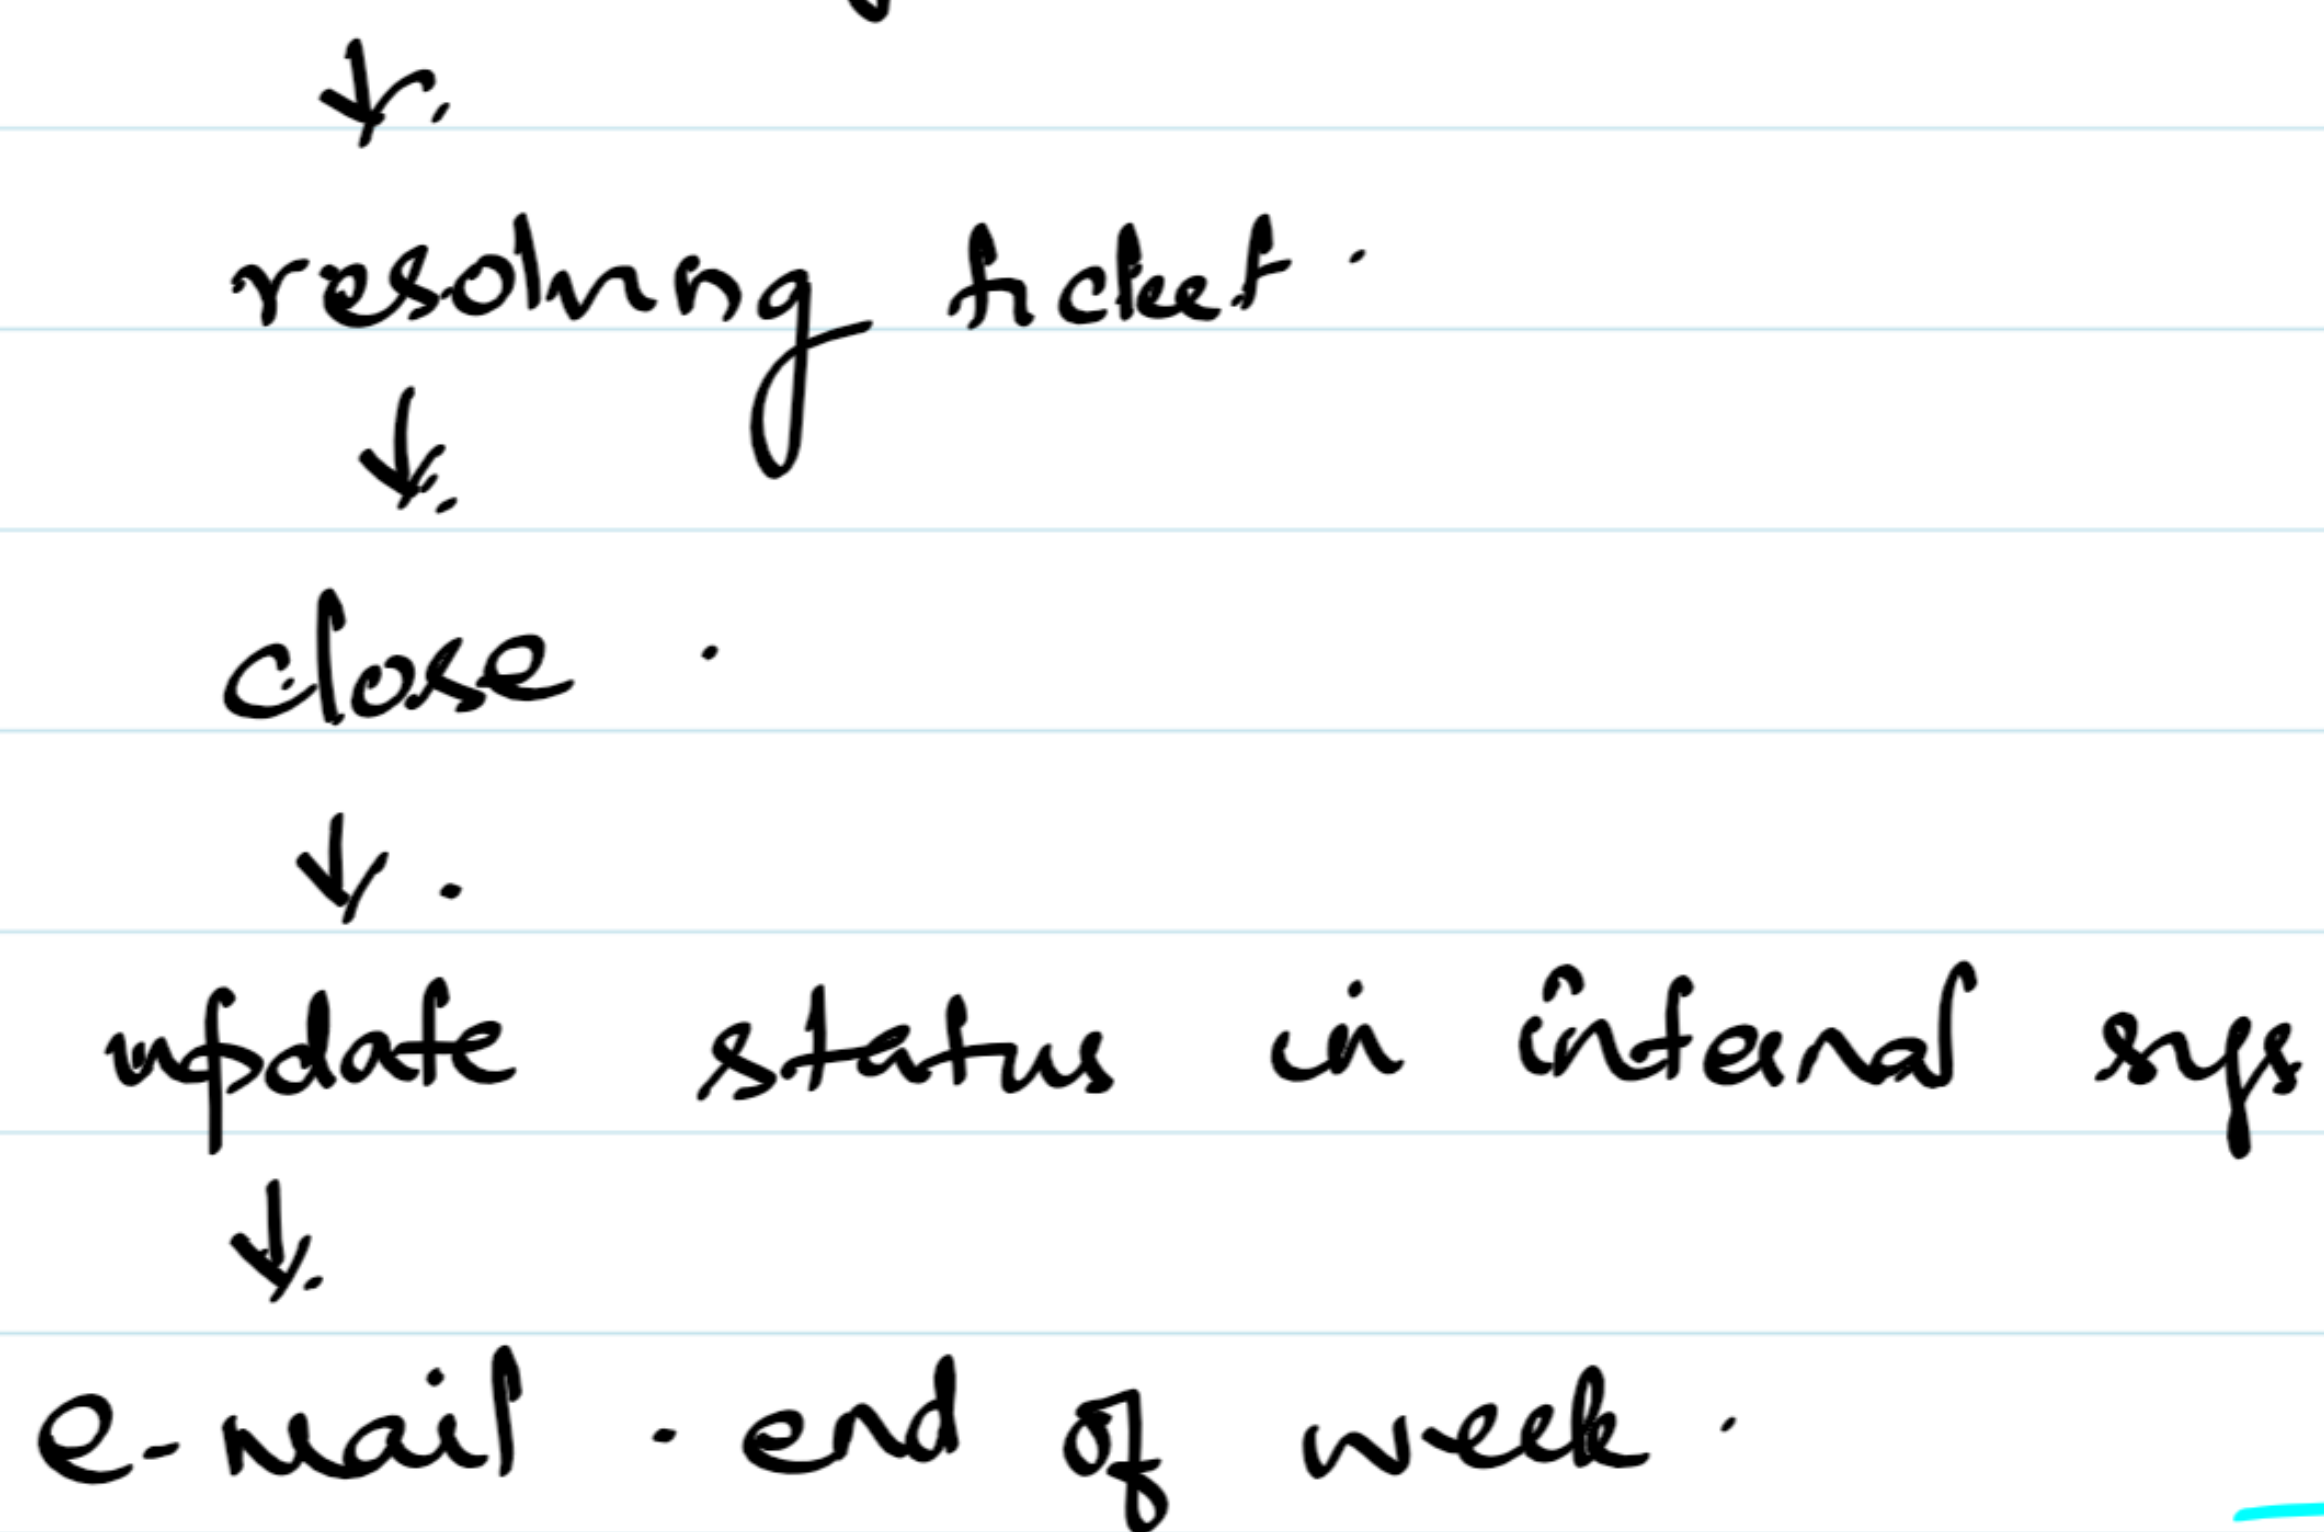

Agent · Framework — pro code, multiagent · orchestration

Agents

- specialized task ✓
- take conversational memory → perform tasks.
- tool calling ✓, continuous convers.
- manual repetitive work ✓ - automated
- take decisions ✓ like humans.

Repetitive / Monotonous work automated.

ex: customer support - ticket assigned

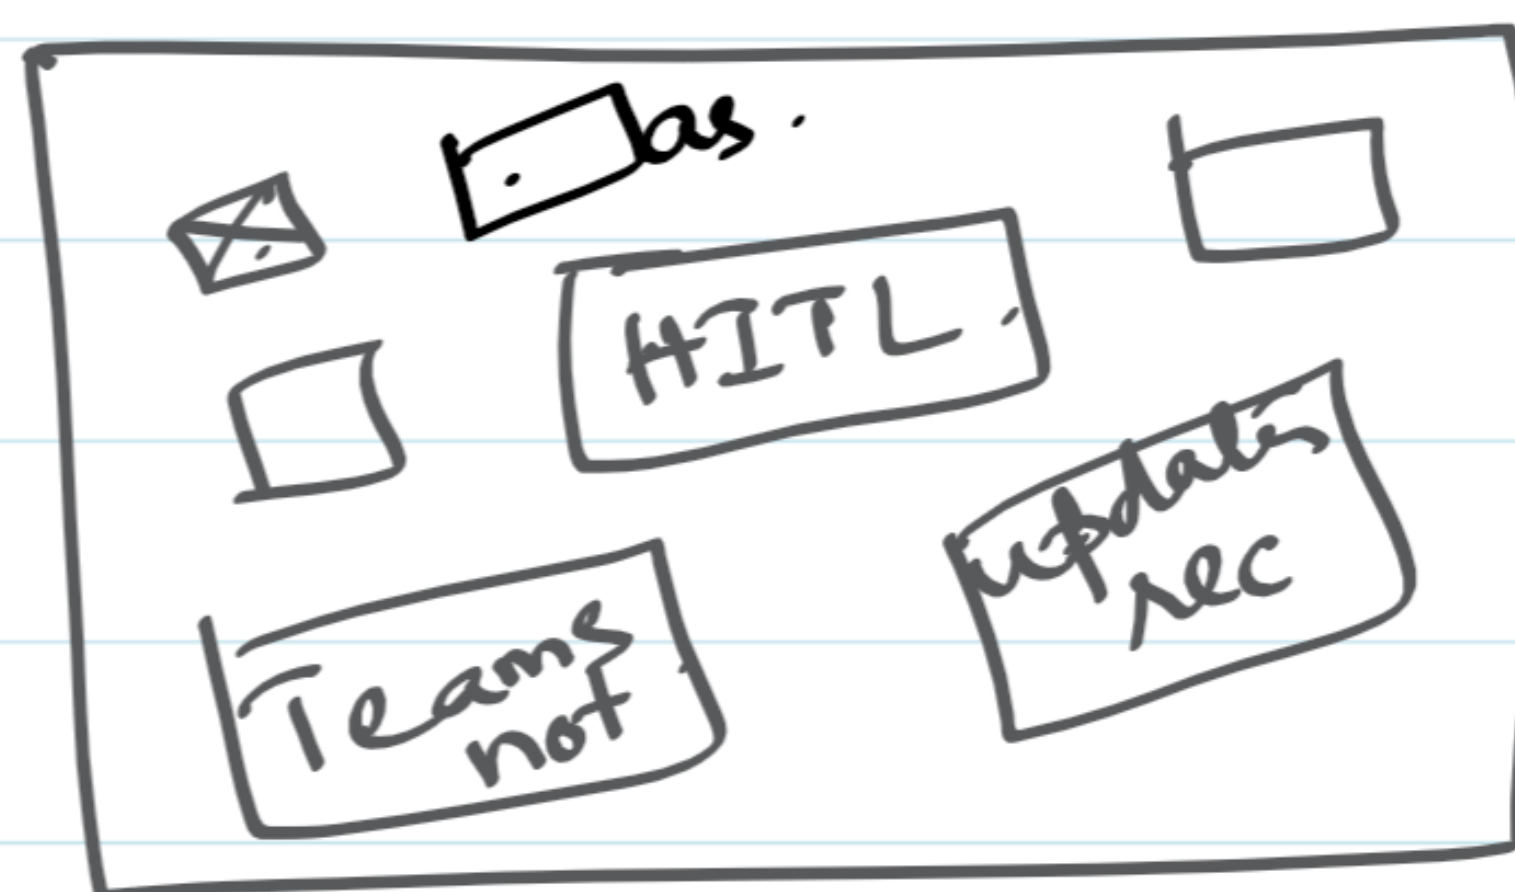

automated.
Agent?

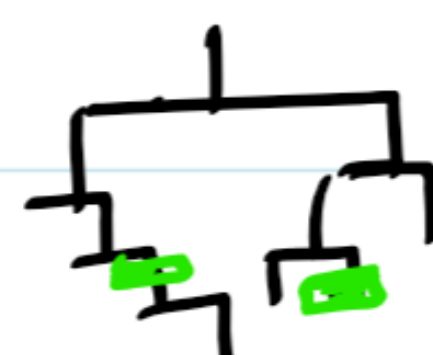

- power automate.
- email gen.
- event based.

Automation Vs workflow Vs Agentic

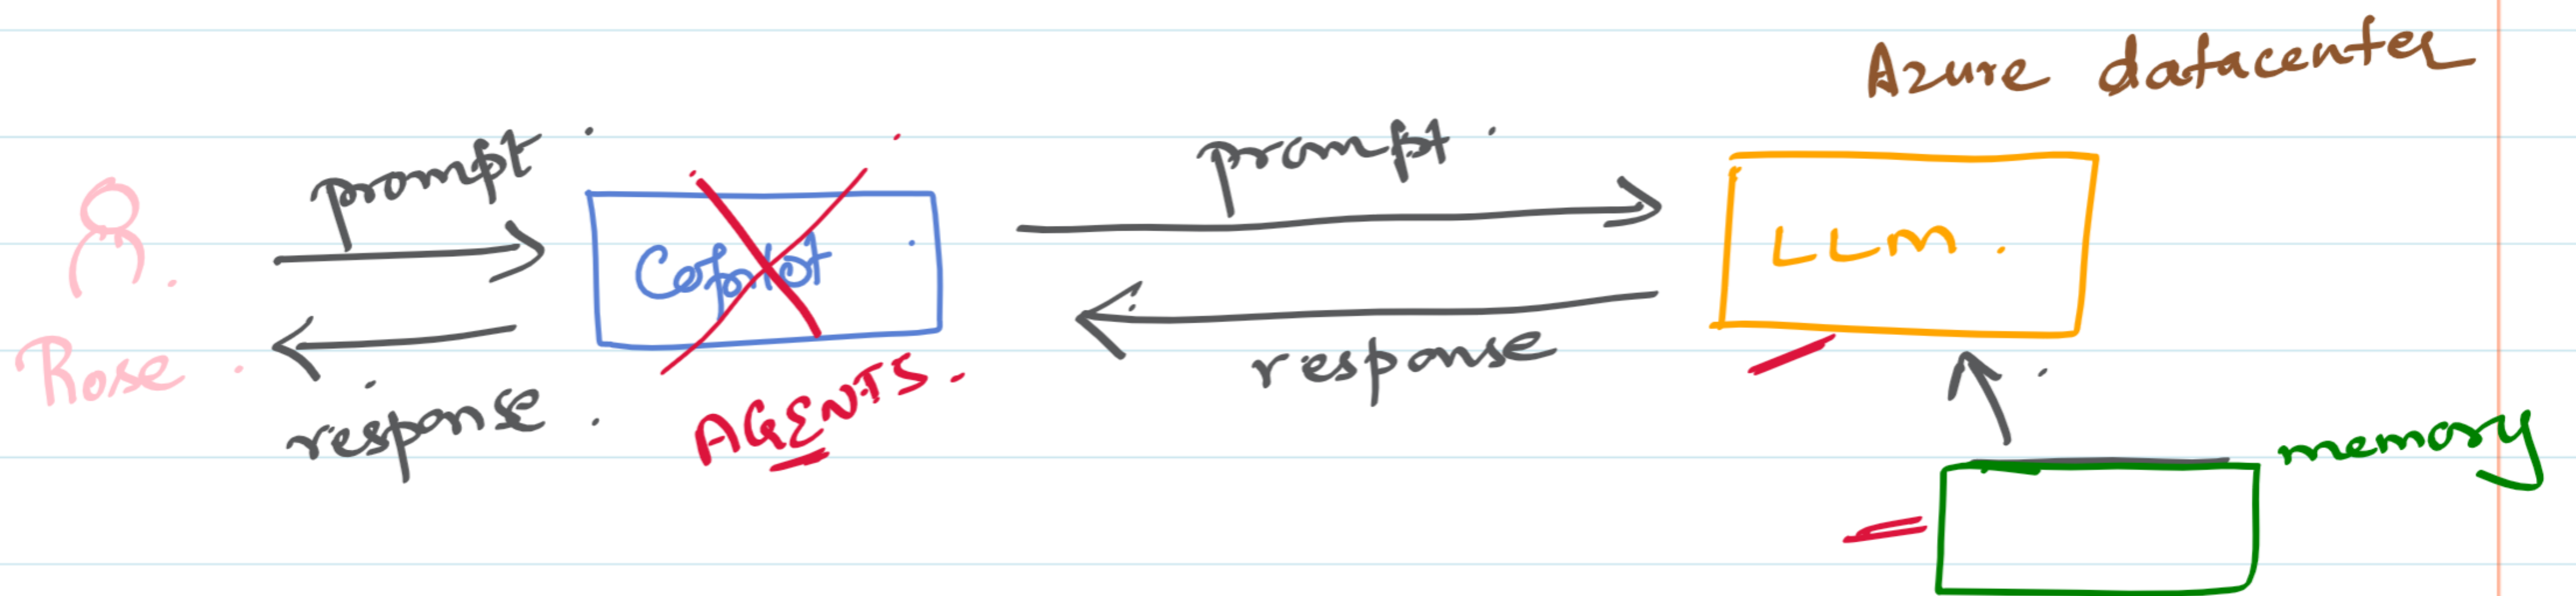

Agent → goal.

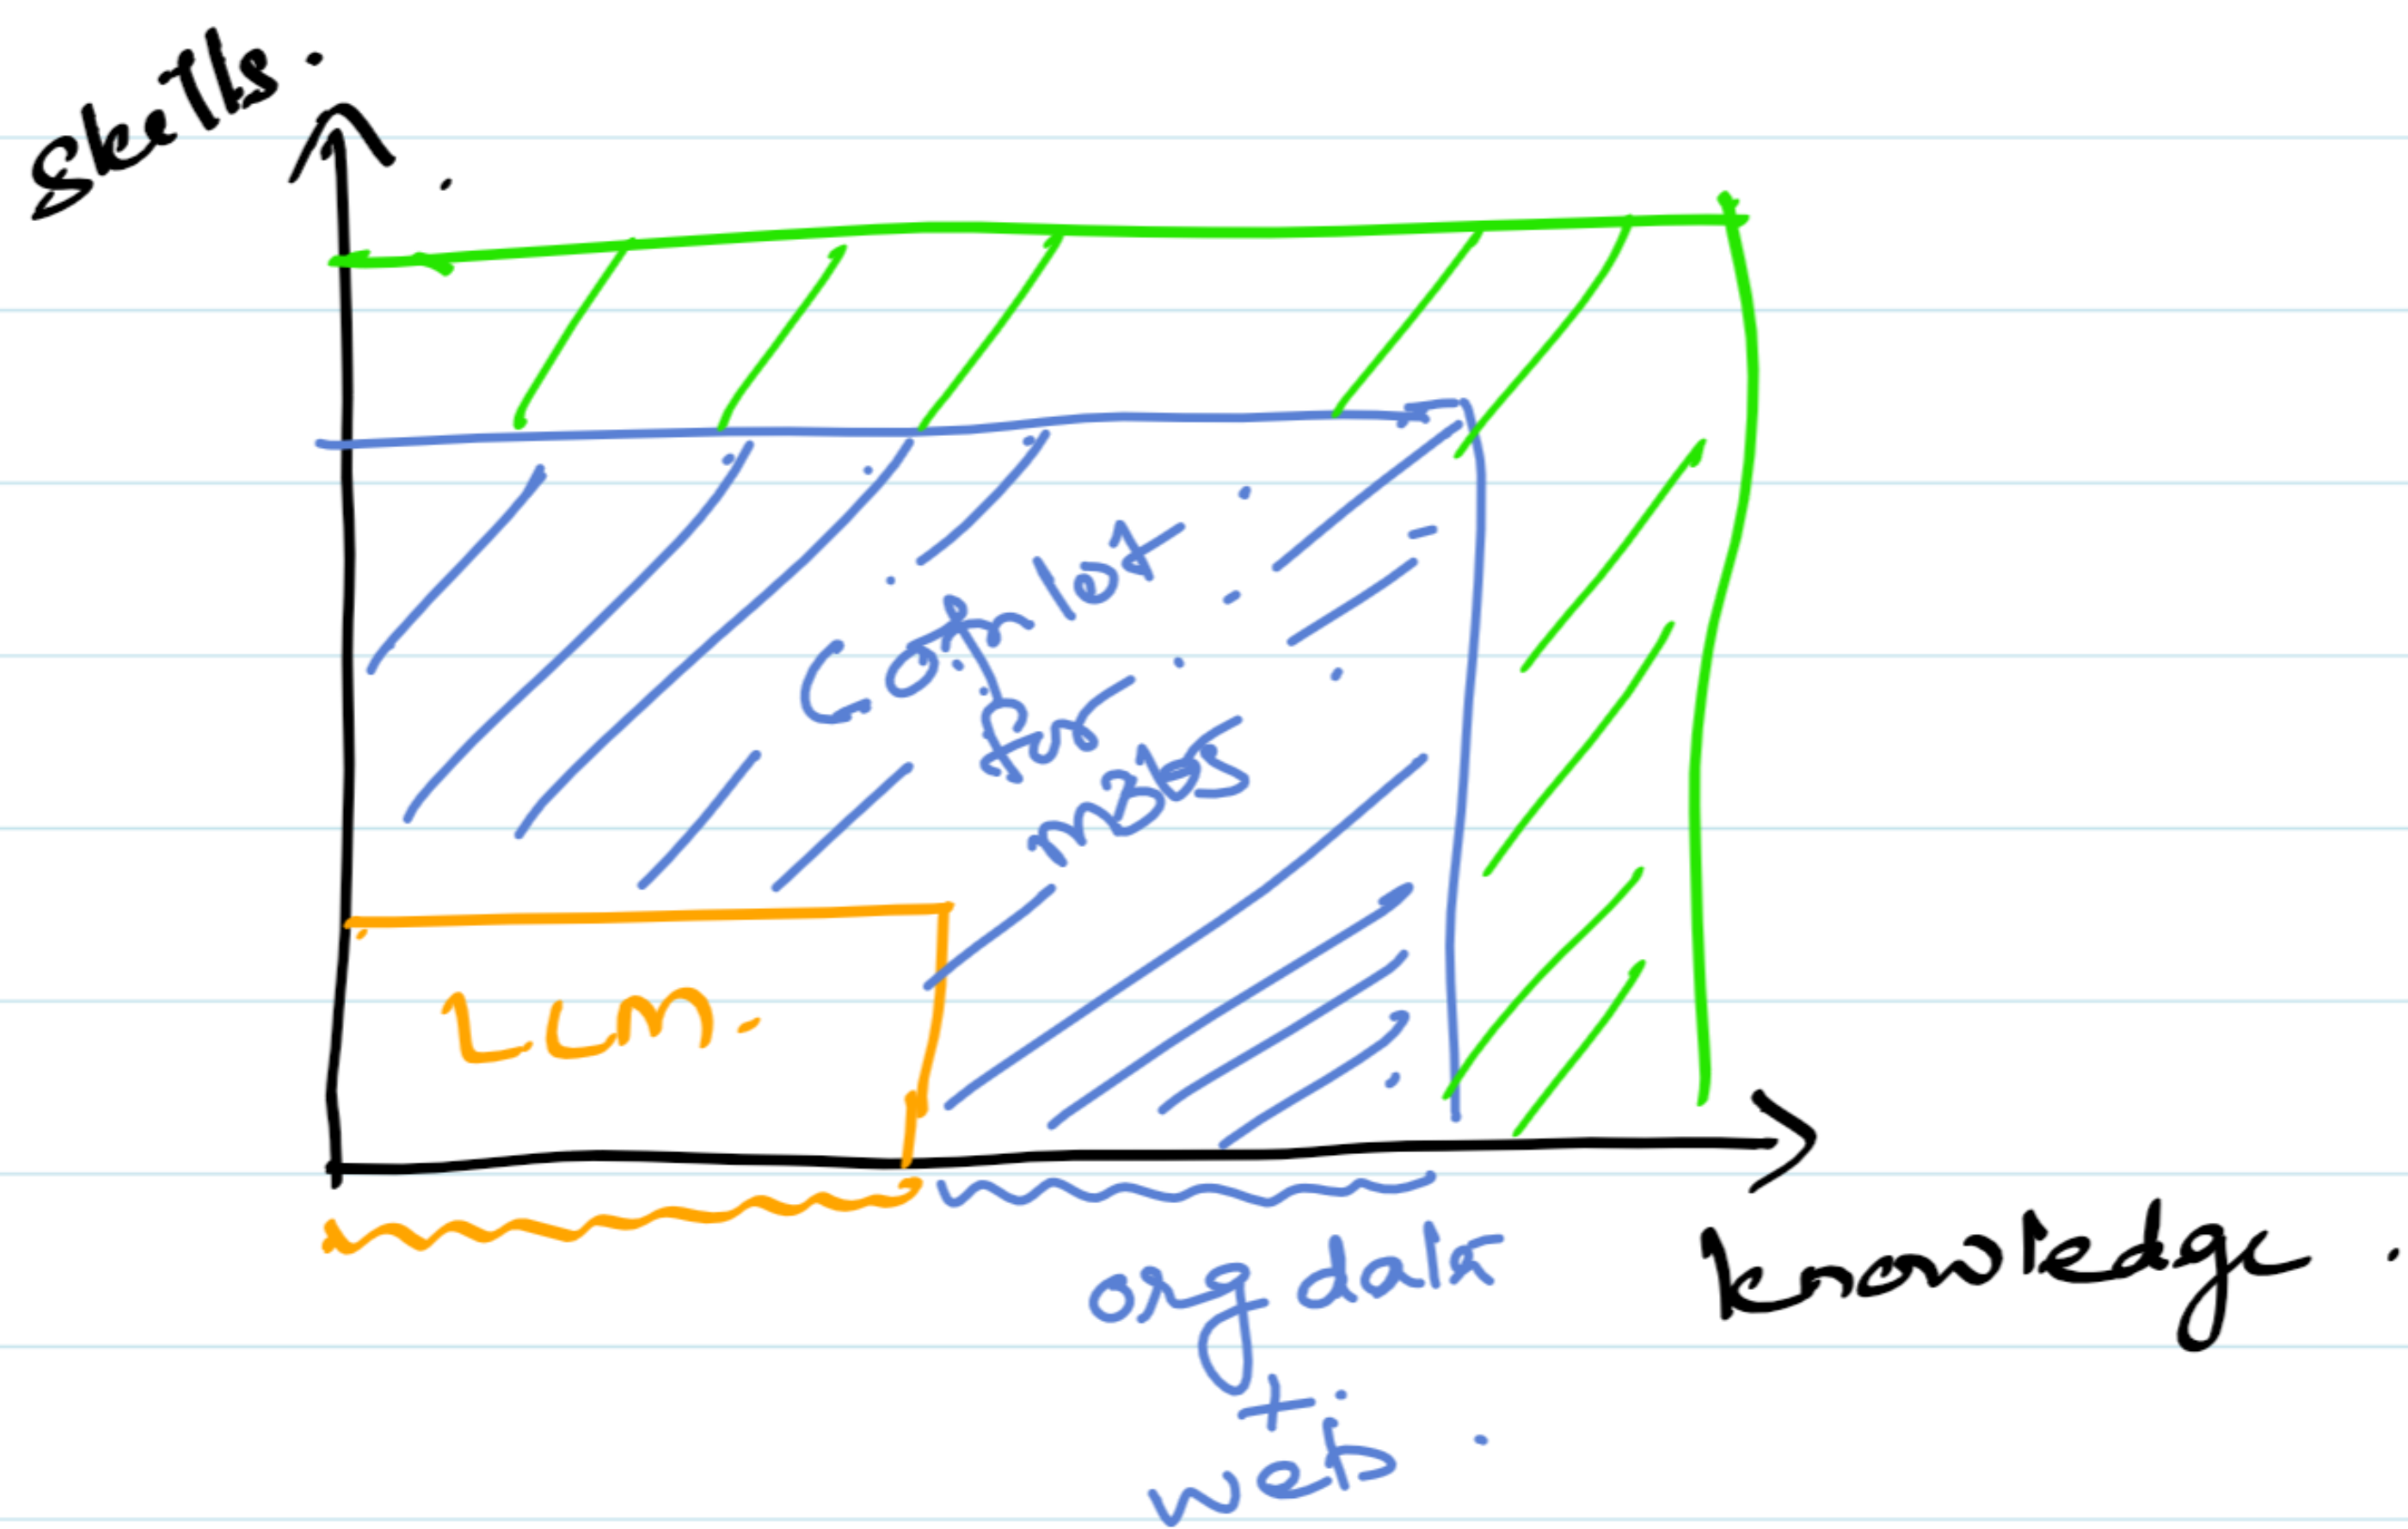

→ goal. → pre-defined

Copilot LLM ← brain of copilot.

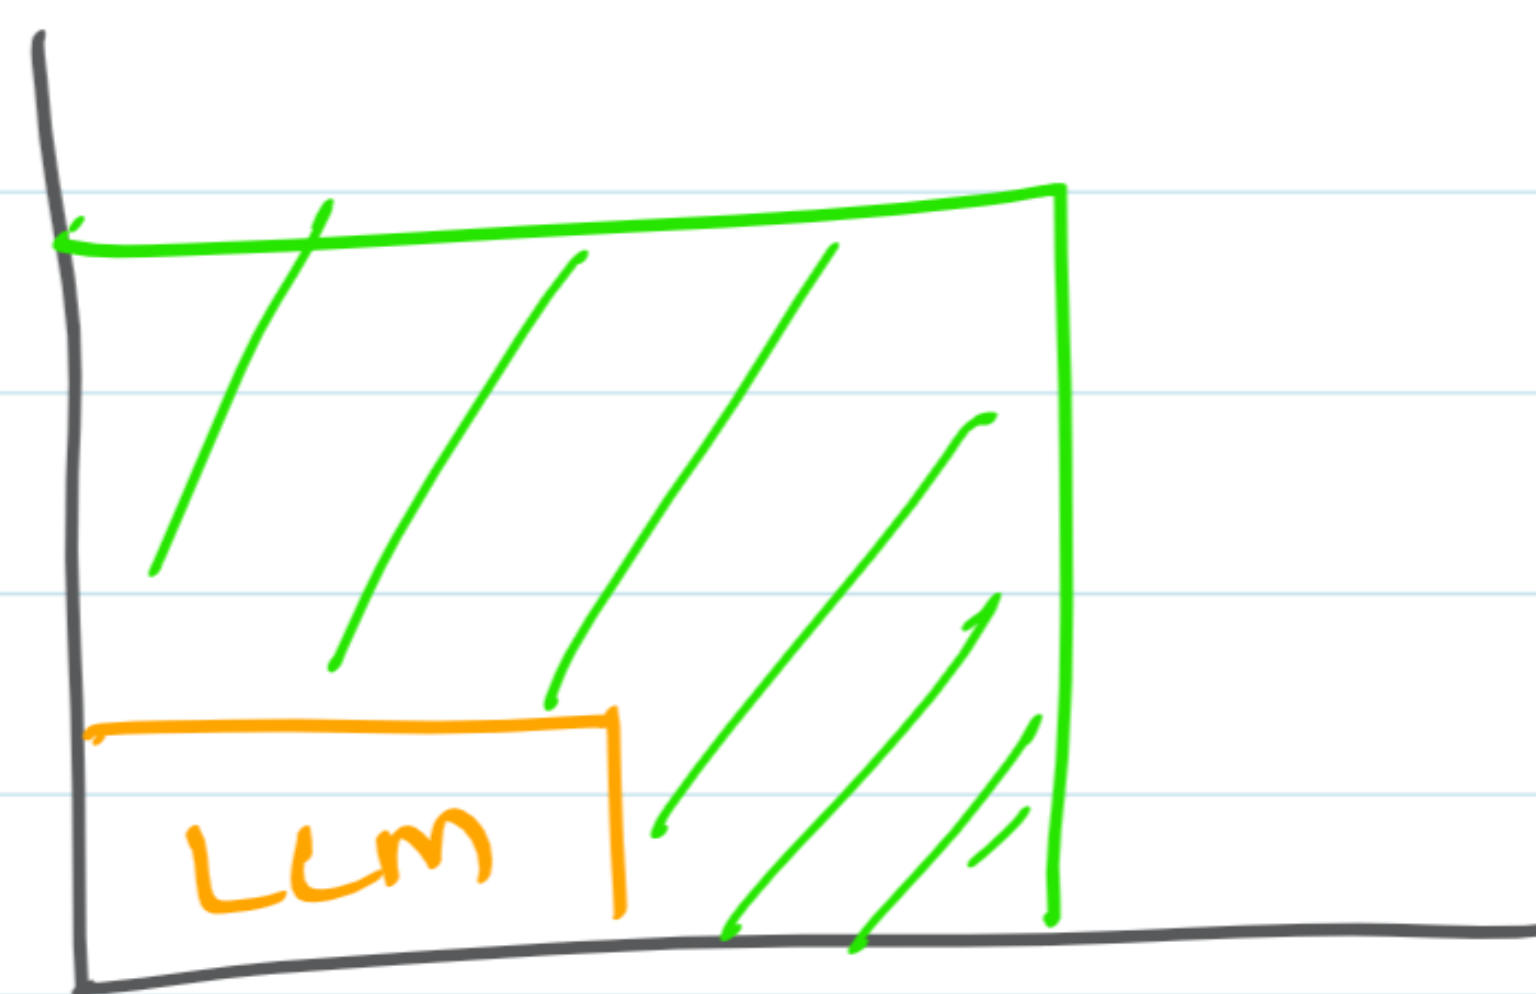

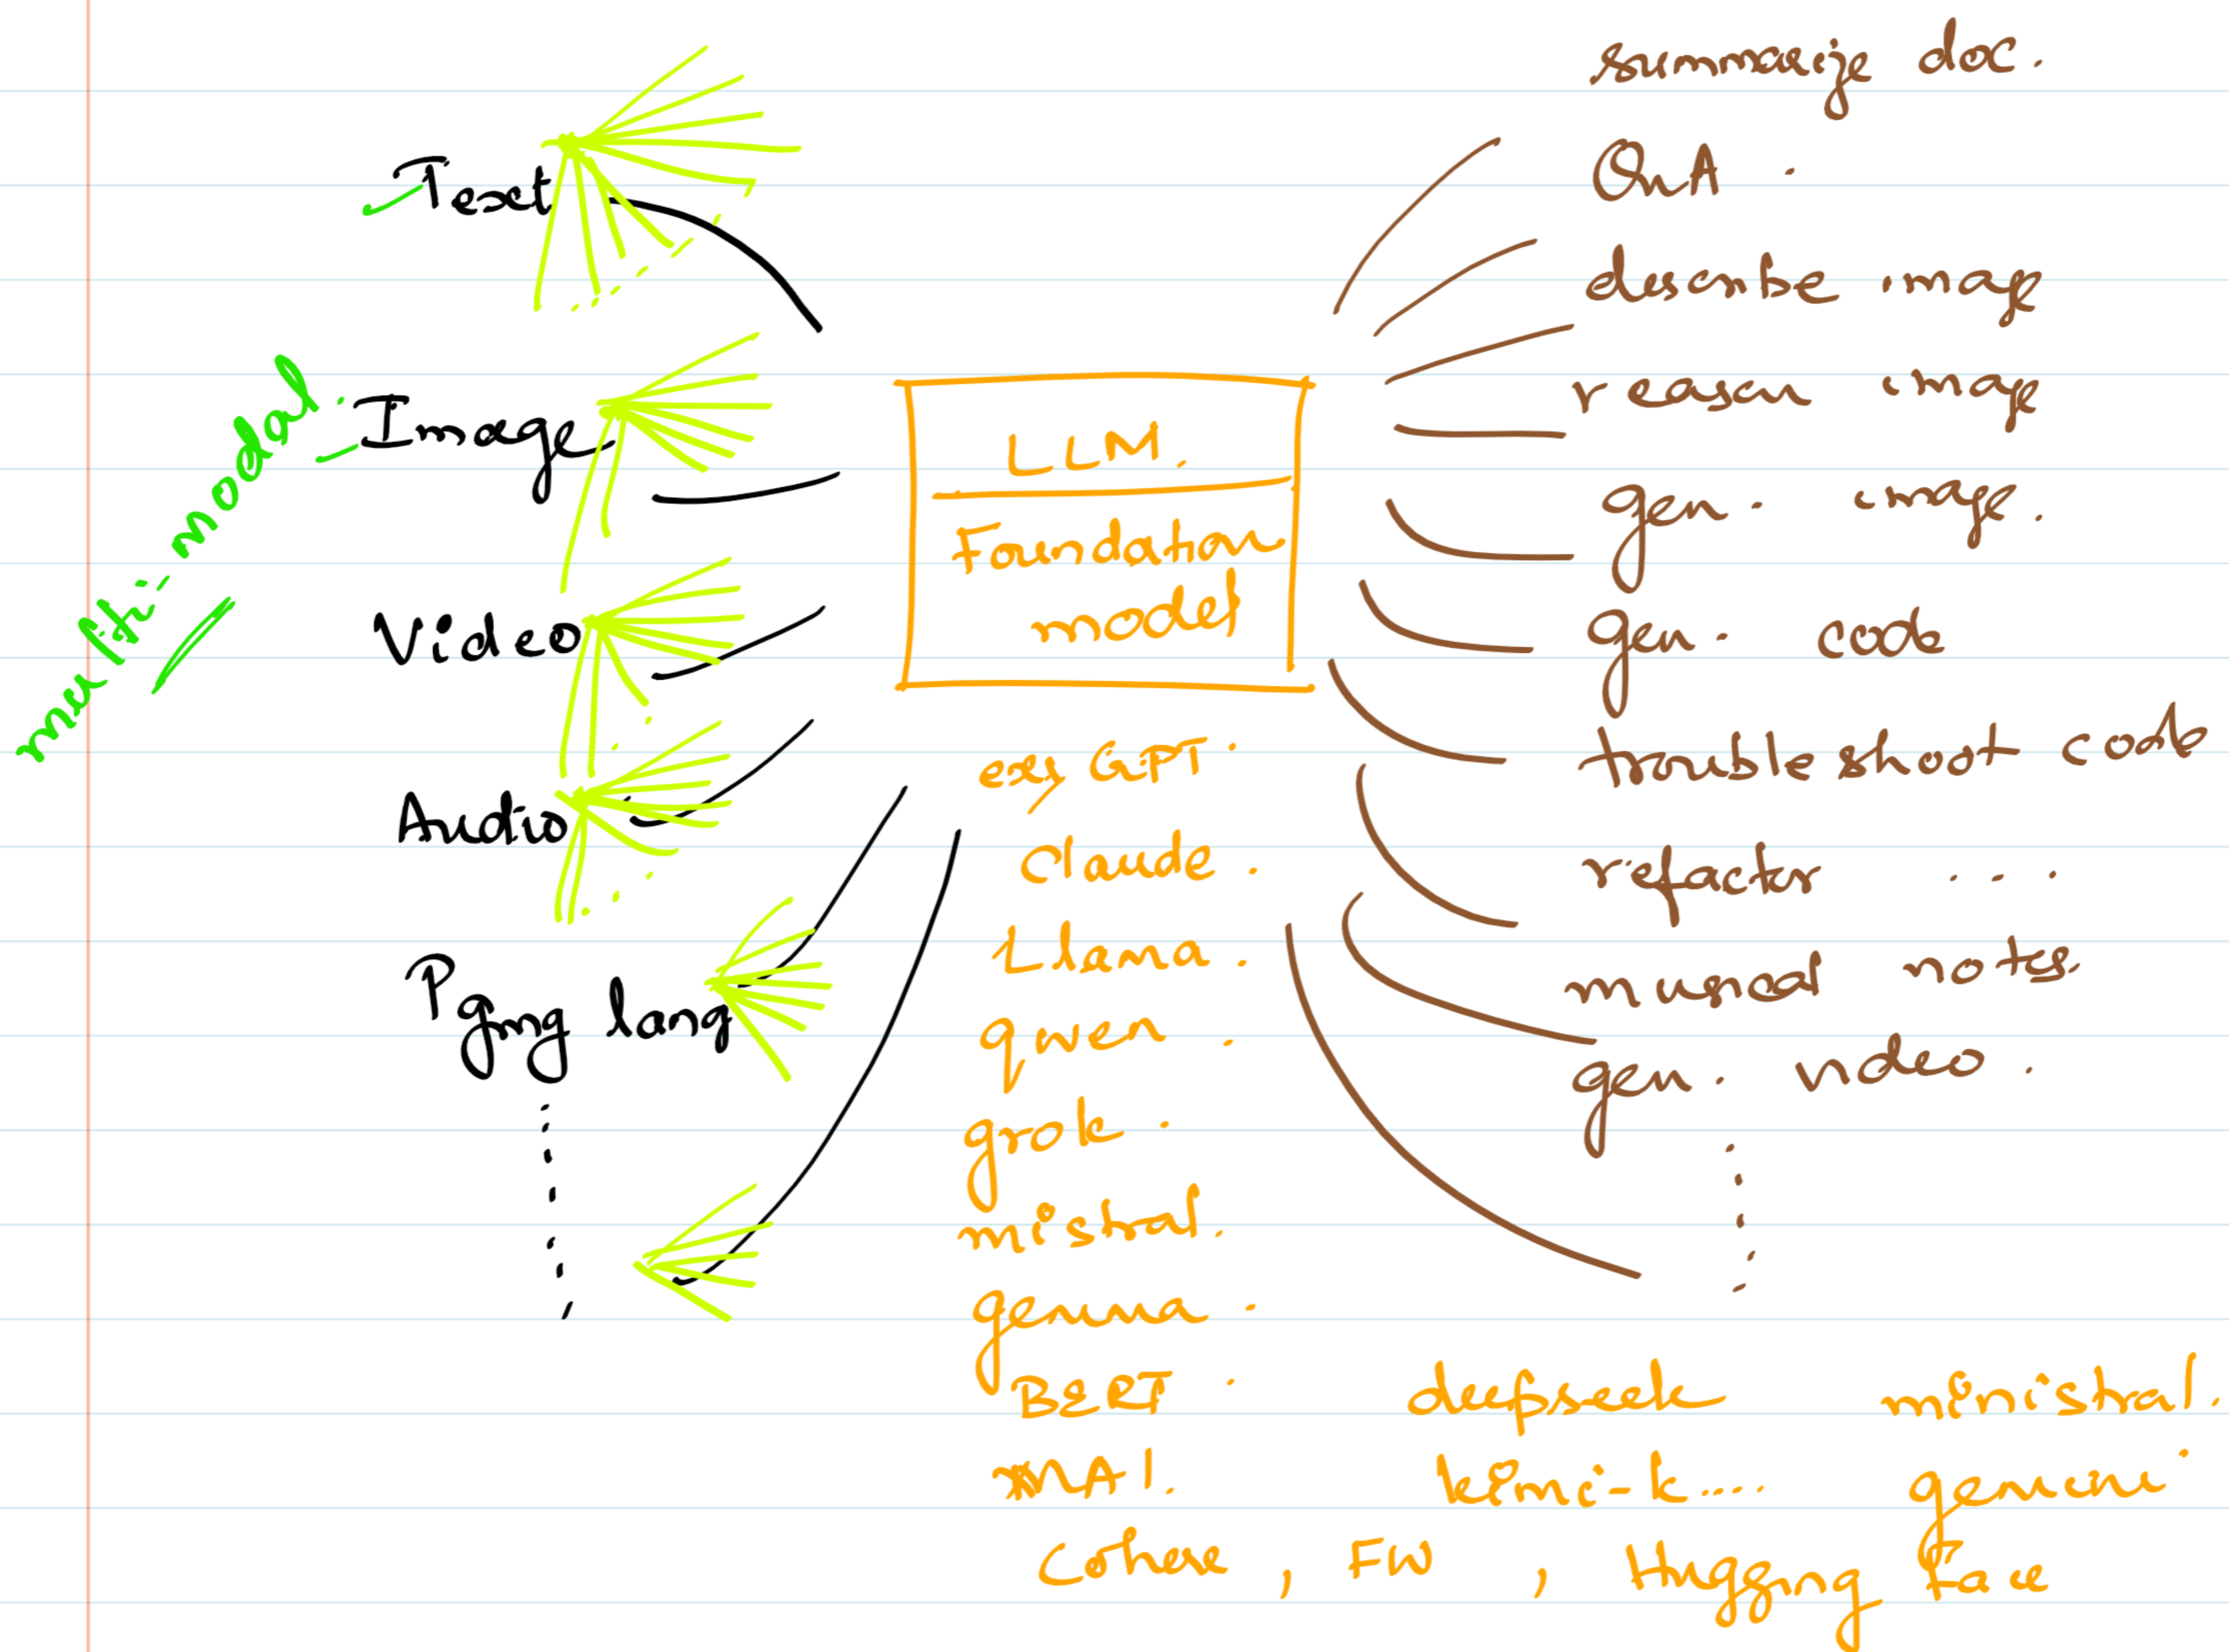

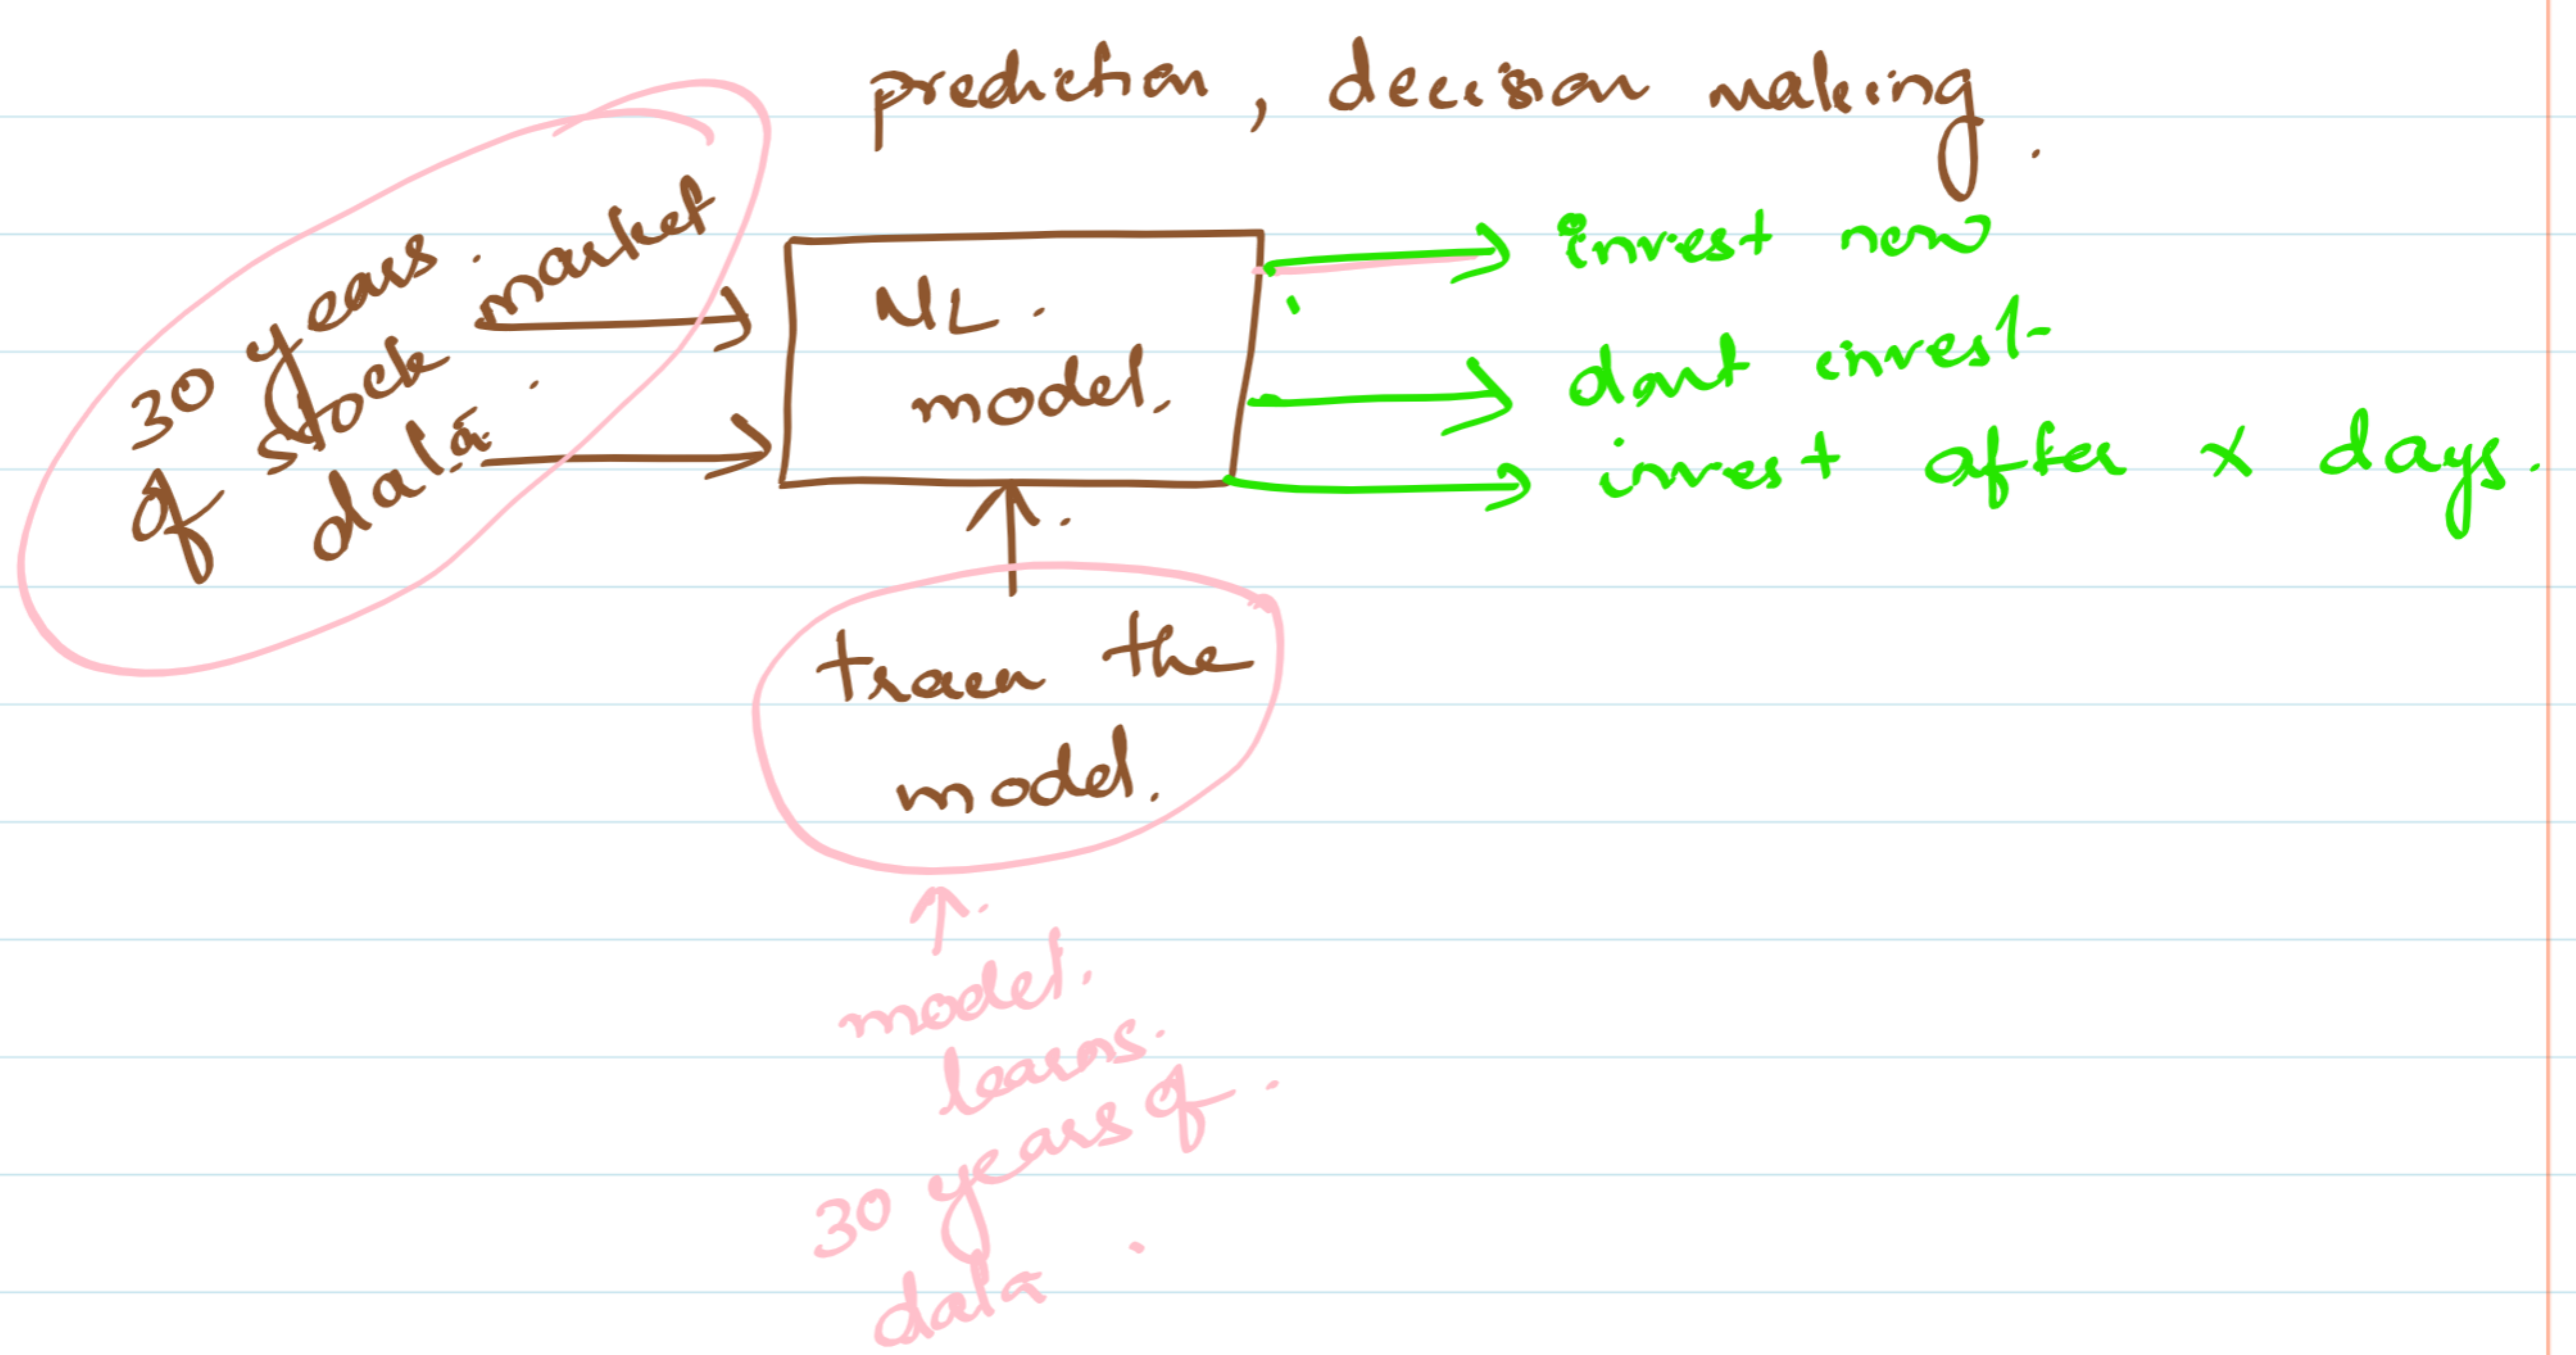

SLM - Small Language Models
 ex) 5 GB - text
 8 GB - text + image
 15 GB - text + image
 ex) Ollama, Hugging Face

1) customer support
 - ticket assigned
 read ticket
